FURRY SELECTION

BASEMENT ONLINE DOCS

BY STEPHEN T. FLINT AKA RINTY SKYCOYOTE

(UPDATED AND EDITED - 12/29/2025)

9th of January, 2025

Man... it is January of 2025 for me right now and this year is gonna to be different for me instead, so my plan is I'm going to write many journals as possible so it's going to be a very, very long story I wanted to write something it's competitive and strongly believed how I feel it's love, fearless, or hate and effect their minds out of control to become a legend compared to anyone else, apparently, everything is changing and the new motto is going be “IT'S TIME TO UNSTOPPABLE RISE OF ME” and “FURRY SELECTION” for planning something bigger, become a meme legend, become a legend compared to anyone else, be reborn as a furry, but starting a new life as a baby furry, have a new furry family, living in the furry world, Furuniverse, including with small towns, urbans, cities, vehicles like trucks, school buses, cars, buses, and everything else in the furry world, but in different reality for real, and more since it's going to be an epic plan what I'm doing from now on so we can be a Furry Selection group together so come join us so it would be a lot fun to do and hopefully some of us we will be reborn as furries, but starting a new life as baby furries, but living in the furry world since there are less criminals in many countries in the furry world, but more peaceful than this world plus bit bigger than this world, but it's a concept reflected a blending of reality, peaceful, love, and fearless to have the souls and magic of minds to be reborn as a furry, but in different reality and I can almost guarantee for that it is real and it's part of Furry Selection group and yes together, come join us so it will be much fun to do for the incredible journey.

20th of January, 2025

So for my opinion, I am obsessed with girls and I wish I wanna have a relationship with a girlfriend in reality, so I can be friends with a girlfriend, apparently, if I have a chance to date a girlfriend, I would be a loved one, but in reality, I recently do not have a girlfriend since I wanna date with a girlfriend one day if I have chance to date with new girlfriend, so I would appreciate it, but speaking of obsessing with girls and having a girlfriend.
I would rather try something different instead, like making lyric videos, drawing random stuffs like furries, animals, and other things, making short films like 2d or 3d animation short films, and more things I wanted to try something new instead, but unfortunately for me, I know I always hate living my own life for being a poor person, strict, and loneliness so much for my opinion it's because sometimes life isn't fair for me during in school for my late high school years, I know I'm in 12th grade, I know I'm 19 years old it's because I'm a young adult and I know I'm still a teenager, apparently, for that people did do a very good job at drawing arts or digital arts and published on the Internet during teenage years in the past and now on and true for that since they've learned it in during in school years in the past and now on and chances are I can almost guarantee I would have to learn myself to do a very good job at it to drawing artworks if I do a very good job at it, so I would be appreciated myself.
So back then, I did started to join on Deviantart since back in mid-2021 and then started to make poorly made gif images and drawing poorly made digital arts and then post it on Newgrounds on the Internet since back in late-2021 when I was 16 years old and then I did started to become a modder when I was 17 years old since back in mid-2022, but unfortunately for me back then, I was bad at modifying mods and then I did forgot to put the file on content on ModLand when I published it and then it did get better, better, and better for me as a modder, but unfortunately for me, I almost ripped damn my face off and I was too worried, too scared, and too afraid to do that and I do not know why I do that like that and I was a crazy person who do that, but it was back in the day before I became a legal adult and I know I have some of my accounts are inactive, which some of my accounts joined back then... so yeah, but this is why I want to try something different new instead, so yeah.

26th of January, 2025

That time according on the live news Donald Trump takes the oath of office again in his inauguration and become a president of the United States again inaugurated as the 47th president of the United States with his new vice president JD Vance the first U.S. vice president with facial hair, but in fact over the last couple years back then he was a 45th president of the United States with his vice president Mike Pence since he did took the oath of office in his inauguration back in 20th of January, 2017, so yeah, apparently, it was back in the day when I was in 5th grade since I was 11 years old when I used to be a skinny person and truly times it's in the past.
So for my opinion, I have to completely done writing my very long story about believing in afterlife to be reborn as a baby furry husky girl for starting a new life, but born into upper-class family, living in different world as of furry world, including with different furry species, different universe in real-life (Furuniverse), where the place is more peaceful than this planet, including little to no criminals and no intentional mass-violence incidents, however, it's an extremely peaceful place and pretty much instead, for joining it in real life so I decided that I wanted to completely done it for today if not tomorrow, maybe I don't know it sucks, but who cares... so yeah, and give it a fair chance it takes time and it took me a while to write my very story about being reborn as a furry and living in the different world at least I have to complete it for today or tomorrow, but truly for me instead, and I know the time is going too quickly for me for these days and man... this sucks.
I wanted to like slow down the time in my own life sometime like taking a break or trying something different new instead, for slowing down the time during at home so I'll be lucky for that, but unfortunately for me, I know the time is going too quick for me for these days so this is why I want to slow down the time for my entire life sometime, but true for me instead, and I've would imagine that I had to sleep early tonight so that is why I tried not to stay up too late a lot of times during nighttime, but for my opinion I have to like put my phone away first and then go to sleep early so that's a better way I wanted to do something during evening, apparently, might just get fair enough for that.
So that time the Internet is not the same era anymore as it used to be since the era of the Internet has changed through the years, but right now the Internet is a particularly negative space, misinformation, serious allegations, toxicity, and other kinds of harmful behaviour problems. However, the Internet is getting worse and pretty much instead.

3rd of February, 2025

60 minutes away ahead, I am always 60 minutes away ahead, this has been a peaceful times I've been noticed, it's a huge place, it's a masterpiece, it's a better place, it's a furry world, it's a Furuniverse, it's a huge military base, and it's a different reality to observe for living in the different universe for real and some of those places have a big diagonal elevator just like Half-life version, but everything around me seems likely to have faded away after I leave this universe. Feels like I'm the last soul to be alive on this planet, everything will not feel the same anymore; my perspectives on everything are different than this universe for the search of ideas, rivalries, and stories, where they encourage and affect their minds out of their control. It's braving, it's enthralling, it's fearless, it's influencing, it's mesmerizing, it's rising, it's spellbinding, it's a real story, and it's peaceful, but a lot times people's feelings are negative a year, after year, after year, after year and a lot of times people are negative a year, after year, after year, after year too as well, but those stories are different between as fact and fiction, people do have a long talk a year, after year, after year, after year and it's true.
There is a lot of fucked up shit going on in this entire fucking world, bomb threats, riots, shooting threats, terror threats, gun violence, mass shootings, school shootings, poverty, terrorism, some of the deadliest mass shootings and school shootings before and after 9/11, some of the deadliest terrorist attacks before and after 9/11, wars, war crimes, and more, people get into sad thoughts, people lost their goddamn lives out of their control, not everyone wants to plan a mass shooting or school shooting, not everyone wants terrorism, not everyone wants war, no one likes gun violence, no one likes mass shootings, no one likes school shootings, no one likes terrorism, and no one likes war, and there's a lot of good things too.
People are the most fucked up creatures on this goddamn planet for sure, however, this world is unequal (good things ≠ bad things), but someday in the future after I leave this universe, I will be wake up in the furry world in Furuniverse, which the furry world is more peaceful than this planet, which there's not a lot of messed up crap going on in the furry world where my entire body is transformed into a male furry husky with a normal brain, which my memories will likely be faded away where I have a normal weight, normal body fat, and my height is 5 foot 9 inches or 175 centimetres tall for being an average person, but short for a male anthropomorphic canine, which furries have plantigrade legs and feet, which is similar height to humans since every anthropomorphic animals will have a feet shape like a human feet, every anthropomorphic animals will communicate like humans, and not every anthropomorphic animals acting like a regular animal instead, and hopefully everyone recognise me where I go to the training room in the military base just like *Half-Life* version, including with indoor shooting range before I go on the underground transit system, which it has dually wheels, from where I woke up in the bedroom with a computer, which the Internet is rising and the month and the year is April of 1998 since I have couple more years to live until the year 2001 and reborn as a furry husky girl, but starting a new life as a baby furry husky girl, but born into wealthy family, which birth year is 2001 for real.

4th of February, 2025

Man... what in the hell is wrong with me? Sometimes I tried to talk by myself or talk to the dogs when my mom or dad is interrupting me for the conversation and it's so annoying and I do not like that way and for my opinion, I always hate living my own life for being trapped in the house for being a loneliness person due to my parents so much it's because it feels so unfair and disgusting for me instead, and I just can't trust about being trapped in the house for being alone due to my parents.
I know those students when I was in the classroom they're being so loud, where those people raising their voices very loud, going crazy, and more to be honest, but I wish I use my laptop so I can write page documents and wear earplugs for the noise cancellation for going to school, but someday I'm gonna get it one day for sure.
So during nighttime I've been staying up late for almost all night long for going too far and I do not know why I did this. I decided that I want to like sleep early during evening so that's why I try not to stay up late all night long for pushing too far to be honest, but unfortunately for me, sometimes it makes me feel uncomfortable when I went to sleep and I know I tried to go to sleep a lot times like staying awake, too much moving, too much overthinking, and other problems when I struggle for sleeping and I recently do not know why what the fuck is wrong with me through the nights and yeah, it happens to me instead. What a hypocritical asshole feels so unfair when I have sleeping problems for staying awake during nighttime and I hated it that way and it happens to me a lot of times for me instead.
I would feel a bit tough whatever I'm doing, however, it might be fair enough for that. So my goal plan is I wanted to reach 100,000 subscribers on my main YouTube channel for planning to work hard for making average production YouTube videos like making lyric videos on Youtube if I try my best and support with other people, so yes, I would like to support with other people to work hard before I gained a significant following to make much money for being a furry influencer and proof I'm going to start uploading again on my main YouTube Channel to upload couple videos as possible and hopefully yeah, maybe, maybe not I don't know it sucks, but who cares anyways and I always be thankful for that, but for my reason is I want to try my best to do for my opinion instead, so I can be only one to infect and linger for my mind to control my mental health problems and I always have to care about money and pretty much and proof that always life is good to be here and might just get fair enough for that.

5th of February, 2025

So that time there are so many undocumented people out there on this entire planet, which people who aren't famous or infamous, but unfortunately for that, there are too many criminals on this entire planet too as why and yeah, for sure, apparently, I know there are many anti-furries out there, where those people are oppose furry community, due to misunderstandings and misconceptions. I don't hate furries, I always love them so much 'cause I'm obsessed with furries and pretty much, but I wish I have a husky dog fursuit at home so I can wear it everyday in real life, but in reality, I recently do not have one instead, and someday in the future I'm going to wear it and yeah, hopefully, but unfortunately for me, I know I don't enough money to buy a fursuit it's because I'm broke and I know I have low amounts of money so I decided that I want to make much money as possible first and then purchase a fursuit, however, it's seems fair to me instead, for obsessing with furries, I am not joking, it's just my story talking about obsession with furries and yes, truly for that.
I've been doing a lot of hard work to modify mods for Euro Truck Simulator 2, American Truck Simulator, Farming Simulator 19, and BeamNG.drive. for a while, but I recently did find something new when I did a tutorial about how to make a sound bank from FMOD Studio for Euro Truck Simulator 2 & American Truck Simulator and it was my first time doing it plus I've been tested the engine sound on Euro Truck Simulator 2 when it how it works, but unfortunately, the engine sound wasn't successful it's because something wasn't right, it was unexpected and sadly I didn't do best as I can, apparently, I finally did find a better project file where a YouTube video was published in 2020 during the COVID-19 Pandemic, which it has a link it's on description, but the language of a YouTube video title and description is Brazilian Portuguese, but speaking of a YouTube video title and description, which it has a different language.
So I've finally did tested the engine sound on Euro Truck Simulator 2 and the engine sound was pretty successful and it's been doing pretty well recently, but after I've tested the engine sound I finally did upload a sound mod online and successfully published it online, but the engine sound mod name is Scania DS11 engine sound where the mod is for Scania 1-Series by Antonio62/Shoofer an unidentified faceless modders who creates mods, but not just only Antonio62 or Shoofer, but the other unidentified faceless modders modified it and my thoughts for my opinion is I don't know who that is, but that's my reason and I know there is so many of anonymous people out there, where those people kept them private, so yeah.

11th of February, 2025

So I published the page document by hand written on DeviantArt under the username *MyJournalWritings* talking about *Warrior Cats* (*Warriors*) about 4 months ago and that story is a bit short where I've written it, so yeah. I always believe *Warrior Cats* fandom and therians are real and yes, that's my opinion, I would be lucky if I read some of *Warrior Cats* (*Warriors*) books by Erin Hunter, so I would just lie down and take a break for reading book and then take a nap or go to sleep, but it depends somehow for my wishes, but I wish I would be reborn as a cat from *Warrior Cats* for living in different reality in *Warrior Cats* universe so I can join the clans and having new friends for living up infinite amount of years to come so I can join it for real, but that's my wish for my afterlife plan to escape the tragedies of this world.

I would have my imagination to have a long life or short life to live in this world so I would have a much time to do, but it feels like this is my last living soul on this entire planet in this universe, everything won't feel the same that way anymore, everything will be different than this universe for real, apparently, it's exactly where those disorders came from and affect their minds and linger their minds for the souls, desperates, and beyond the point for my long stories about me from the past tense and present tense, but truly times it does feel like a different kinds of dreams come true for the handwriting of ideas, rivalries, and stories. In fact there are dozens upon dozens of people out there, where they keep their identity and their younger pictures private. It's because they don't want public recognition or attention at large since they just live as a regular person, but speaking of privacy. I'm going to share my story about my weight, which I've gained and lost weight to skinny to chubby to average so here we go.

So I was born with a normal body and then my entire body did become thin when I was little, which my age did go up so why not for being expected, but for some reason my age did go up for so many years when I was used to be a skinny person since when I was a toddler to child to early teen to late 2000s to late 2010s and then later I did started to gained weight to become chubby since like back in late 2019 when I started to eat too much junk food, so yeah, it was back in the day when I was a chubby person for a while for couple years, but back in late 2021 I did started to lose weight and I actually did started to lose some percentage body fat and become average, including with little bit of love handles since I've been started to do a lot of workout everyday and then I did gain my muscles bigger when I did do a lot of workout everyday, so yeah, it was back in the day about almost 4 years ago.

12th of February, 2025

What a goddamn crazy these days for some reason, but it could be rough these days how it feels, even though it's crazy, but apparently it's true for that to be honest.
I know I am having extremely frustration about living in two-story house in southern Oklahoma City where I live, which it does include weapons like dangerous knives and gun safe, which it has guns inside for planning committing a crime and it does feel extremely disgusting it is, but also I'm having extremely frustration about living my own life for being loneliness, having no money, being trapped in the house, having lack of support with other people, and making poorly made production videos, and I am having little bit frustration about living in two-story house in southern Oklahoma City where it does include power tools too as why, but I prefer using normal tools better than power tools for my opinion and I would to be honest that I have to like swap the PC case to Dell Inspiron PC case to a different PC case, which the size of PC case is Micro-ATX, which I have to like take it out those parts and swap into the new Micro-ATX PC case if I try my best to do it, so yes, very likely for my opinion so I decided that I wanted to order a Micro-ATX Pc case with a optical drive bay, Intel Core i5-2320 CPU, which it has excellent condition and 100% working, 4TB hard disk drive, graphics card, and cpu fan for Intel Core i5 so that's I wanted to swap to different PC case from the old Dell Inspiron PC case for sure, but I don't know if my parents like my mom or dad will gonna be upset or pissed off at me thinking about for I'm doing stupid things like this, but that is my opinion I wanted to do something in the future plan to upgrade it so I decided I wanted to make much money and save money for my opinion if I'm glad I'm wealthy, so I'll be glad I'm not broke anymore and I wish I'm a rich person if I have a dream last night during sleep, so I'm rich, but in reality, I'm not and chances are there are some people are born into wealthy family, but I am many people are born into the middle-class family and I recently do have some of my family members who served in military and yes, I'm just some kid who is the son of an airman since my dad was served in the United States Air Force for two decades and it was back in the day when I was little, but right now I'm a legal adult and I know I'm still a teenager it's because I'm a young man and I know there are some get fired from their goddamn jobs for various reasons, but sadly sometimes they didn't make it and feels unfair for some people and just gonna be ended up facing homelessness forever, so yeah, it is pretty sadness and heartbreaking it is and this world is tough for everyone on this entire planet.

14th of February, 2025

Seriously... why this stupid time is going slow where how long it takes, this isn't fair, so when I leave my backpack in the wall and get a lunch in kitchen near cafeteria, there were so many students in cafeteria where they get lunch and walk through the cafeteria and go outside and eat on the picnic table and it is so freaking windy outside so did I get my lunchbox out in my backpack and open my lunchbox and it has a Cheez-It cheddar jack pouch, Mott's gummies pouch, burger sandwich inside of the bag, but regardless for that, I finally threw away the bag of burger sandwich in the trash it's because I stopped eating burger sandwich for my opinion and I finally started eat my lunch and I also eat food on the tray first and then from my lunchbox, but unfortunately, when I eat hard chewing Mott's gummies it finally did got stuck to my stupid aligners and unfortunately for that, the small rubber band on the left side of my upper aligner did finally detached it and it frustrates me so badly when I eat Mott's gummies the hard chewing gummies when I ate.
So I go inside the school and walking through the cafeteria to the short hallway and I saw that door is pretty locked since I was supposed to go to the bathroom and then look at the mirror and reattach the small rubber band to the left side of my lower aligner and upper aligner, but naw... don't know why those staff members locked these doors, which it's closed when I tried to go to the bathroom and can't deal about how much longer it will take, but it does feel pretty unlucky and unfair for me it is and it absolutely sucks so badly, but it does feel like unexpected sometimes and it's just my short story about today, but that's my first story about my current days.

16th of February, 2025

So I decided that I wanted to have a Social Security number to accept my money from my PayPal account for some reason or to have a bank account to transfer my money from my PayPal account, which I want, but regardless for that, I wanted to make much money so my net worth goal is I wanted to reach like over $50k, $100k, or $1M so that is my net worth goal for my opinion, if not oh well, but sadly I know I'm still broke, I know most people don't care about me, I know most people don't know about me, and I know nobody cares enough about me, so apparently, I would have to work hard a lot to I decided that I want to achieve the recognition, but not just mostly localised in the modding community, but the outside of the modding community and I decided that I wanted to achieve my financial success too as well I wanted to make money, save money, and yes, that is my plan.

16th of February, 2025

There are many of those people who live a better life than some people, better life than me, like what the hell is wrong with other people and why there are other people struggle daily in this world for no reason, life isn't fair for some people, life isn't fair for me too instead, but sadly this sucks... I can't deal with living my own life for being loneliness for a long freaking time, life is long for many people, life is short for some people, people do live their own life, with making money, without fame or notoriety, and doing work, people do live their own life, without make any money, fame or notoriety, and unemployed or not doing work through early elementary school years to late high school years until they get a fucking job, but it depends, however, truly, but regardless, I know it makes me so pissed off 'cause I can't trust about living my own life for being strict like at home, school, or going strict places and it does feel unlucky for me, but unfortunately, I can't deal about being a strict person for my opinion and does feel pretty disgusting for me it is and it absolutely sucks.
I can't take this shit anymore about living my own goddamn life being a broke person, a strict person, a lonely person, and being a trapped person for this fucken thing due to my fucking parents! MAN... THIS IS NOT FAIR! WHY DO I HAVE TO LIVE FOR A FUCKING WHILE FOR HAVING A LACK OF FREAKING MONEY?! IT FEELS LIKE IT'S SUCH A JERK!!! I makes me so pissed off so badly and it sucks so badly when I live in the fucking house, including with weapons where it has a gun safe, which it has guns inside, knives and other types of weapons as a household for me planning a committing a fucking crime for harmful or violent actions and yes, it is a crime, but in fact that it does feel like endless hell living and cases that it's pretty hard to live for this worthless piece of crap.
I know there are many used to play Call of Duty series, Counter-Strike: Global Offensive, which that game was officially succeeded by Counter-Strike 2, and other kinds of video games back in the day when they grew up from the past, but it was before the COVID-19 outbreak since this world was extremely hell to live 'cause it was pure evil and I remember it happen back then when I was in middle school where the coronavirus spread just only China first and then around the world before I turned my age 15 for my birthday, which millions upon millions of people died very far from the COVID-19 outbreak and it's a huge sadness and yes, it's very sad where so many damn people lost their freaking lives out of their control. Earth is such a beautiful place where we live, but there are so many tragedies and such a pathetic life in it that I have to live.

17th of February, 2025

When I went to the dentist in Norman, Oklahoma I recently did get my new aligners for planning to wear it on my upper teeth and lower teeth where it has a same number and bag of aligners it actually says "11 of 33", which it has right way to wear for my teeth, but unfortunately, I did wear upper aligner number 10 and the bottom aligner number 9, but regardless, they aren't the same number. So, last week when I out the aligner bag in the box it says "10 of 33", there is one of them the upper aligner is a right way to wear for my teeth and one of them is a wrong way to wear for my teeth and it looks pretty when I tried to put it with my two hands, which something isn't right since I did had to wear lower aligner in number 9 for two weeks, but it was last week.
So first we went to McDonald's and I had double Big Mac burger, Coca-Cola drink, chicken nuggets, and french fries and then I recently had an extra food where I had normal burger and sweet tea and then we went to Moore, Oklahoma, which the Tractor Supply Co. store is located near high school, elementary school, and the highway, but before when we go into the store I recently did dump the ice on the grass first and then after we enter the store I threw away in the small black trash can where it's near the exit area, but unfortunately for my dad, he didn't know about me where I dump out the ice on the grass, which my dad thinks that I'm getting hit by the vehicle and I was so pissed off at my dad since he didn't know about that... so stupid, apparently, that's what happens when I dump the ice on the grass and then throw it away in the trash and there I have it.

18th of February, 2025

That time I'm always obsessed with furries and pretty much, but basically for that, I recently did published a page document by typewriting on Google Docs on DeviantArt under the username *MyJournalWritings* talking about interested in furries, which I'm obsessed with and that story is a bit short where i've been typewritten it, but I decided that I wanted to be a fursuit guy everyday and my fursona species is going to be a husky so why not.
It would be so much fun if I'm a member of the furry fandom and maybe yeah... I would believe so, but unfortunately for me I have low amounts of money 'cause I'm broke and I know I don't have enough freaking money to purchase a fursuit for this damn thing, but in fact I would like to meet people with a fursuit on sometime in reality, so they can communicate, bark, howl, or roar with me I don't know it doesn't matter to me and yeah... it would be a much fun to do and there are some of big furry influencers out there where some of furry influencers gain a huge following, making much money, living a better life, be playful, and other kinds of things can do anything what they want, so yeah.

23rd of February, 2025

When it comes to the attention on the internet except mostly localized on the modding community so the game it would be BeamNG.drive., which it has most downloaded random mods online and proof that being an online modder is not a job, especially if you make low amounts of money if you upload a mod file on these non-direct monetization earning money websites like ModsFire, ShareMods, and other kinds of non-direct monetization earning money websites on the internet before it published, it's not typically a job to do, but if you make much money if you upload a mod file on these direct monetization earning money websites like Ko-fi, Patreon, and other kinds of direct monetization earning money websites on the internet before it published, it's a job to do.

So like I said before being a online modder is not a job, but in fact for my opinion I wanted to shift into YouTube so I decided that I wanted to make average production video or high production video and then upload on YouTube to get a lot of views if not, I will just get a normal freaking job for my reason, but if you make poorly made production video and then upload on YouTube to get low amounts of views, it's not a fucking job and I can almost guarantee for that YouTube does requires larger audience for monetizing the YouTube Channel, especially it does require a lot hard work and supporting with other people and true for that since YouTube has been changed through the years. I know there are some small YouTubers out there do try their best as they can to make an average production made video or high production made video and then upload on YouTube with a good title, thumbnail, & description so they can make their good money and doing good job at it, but it's true. I always do still have much time to do and and regardless for that, I'm not just be in my room watching YouTube videos, playing games, and others kinds of shit what I to doing, but I do work for my opinion instead, and I wish I can get a job before I graduate high school so I can make bits of money what I make, but life is good and might just get fair enough for that.

I know there are people out there online like influencers, internet artists, and other kinds internet-based job people on the Internet keep their identity private like their full name, middle and last name, or middle name private 'cause they don't want to reveal it and regardless, they don't want to reveal their face either as why if it does look pretty ugly, so it would be weird thing to do that inappropriately, but true. It seems like it does feel pretty fair and lucky for me 'cause I would imagine that I have to do a lot of hard work and do a very good job at it so I would appreciate it.

28th of February, 2025

So when I was in 2D/3D art class in the 3rd hour I saw a tall teenage girl making a fursuit and I was like “wait is that a fursuit?” and she goes “Yep.” since this was my first time seeing a fursuit in real life, but just a fursuit head from where she's making, but some kind of like a material where she's making a fursuit head is a foam and yeah, it does looks like something it's strange, however, it is real and I've never seen that kinda thing like this before in real life... so yeah. For my opinion I wanna say it clearly that it was my first time seeing the fursuit in real life and maybe one day after going back in school after switching class to 3rd hour, I’ll be seeing a fursuit, where it’s fully completed for the first time in real life.

2nd of March, 2025

6 months ago back in late August 2024, it was my first time making school vlogging where me and 2 boys were saying something together during in 4th hour in tech class, but after I finish recording my first school vlog video, I recently did do little bit of editing just only some of video clips where I cut through in the half like beginning clip of the video and ending clip of the video, which I cut it in the half and deleted it, but it did took a to converting a video due to its processing before I upload it on YouTube.
So when I upload my first school vlogging video on YouTube where the YouTube channel is under the username *Totally Not FurryManforme1976*, chances are it’s not gonna get many views and in fact I can almost guarantee for that it’s not gonna get many views as possible, but if my first school vlog video did get many videos, so it will blow up and the views will go like at least 100k views or over 100k views I don’t know maybe something like that in the future it will get many views as possible... we’ll see, but speaking of making vlog videos.
I would like to make a better video and then upload it on YouTube, where my new channel was created almost 2 months ago and yes, my new channel is almost 2 months old so it would be like 8 days away from 10th of March, 2025 so it will be 2 months old, so yeah. It will get like more than hundred views, thousand views, ten thousand views, or hundred thousand views whatsoever, but it depends and chances are not many people will gonna watch some of my videos on YouTube, so yeah, I haven’t been uploading that much recently due to its lack of inspiration I’ve been trying my best as possible and regardless of that, my YouTube videos kinda suck.

7th of March, 2025

I hate that way where I hit puberty with developing my facial hair, my axillary hair, and my body hair too as well and it does feel pretty weird, uncomfortable, and disgusting for me it is, but regardless for that, I don't like guys either, particularly many of guys with facial hair, axillary hair, and body hair, they're weird and disgusting, but they're kinda like werewolves whatsoever. I always prefer girls than guys better because I'm obsessed with girls, but I never thought about I wanna be a transgender person, I never thought I wanted to be like many of these guys who grew with facial hair, axillary hair, and body hair to look like a werewolf, I never thought I'm gay and proof that I am not gay.
There are some men who married to another man as a husband that means they're gay, but there are some women who married to another woman as a wife too as well that means they're lesbian. In fact there are different kinds of sexuals in the LGBTQ community, but makes me wondering about those kinds of gender identities and it's safe to say there are double main genders and yes, there are only 2 main genders, male & female, blue & pink, and where many people were born as male and many people are born as female; my thoughts is I never wanna be a trans woman, but there are a lot of LGBTQ people out there on this planet, but always a pride month for every year.
I know my voice is sort of like high-pitched sound, but every time when I talk when I say something in my body language my voice does sound like an old woman, but yeah kind of and it does seems like I am thinking about becoming a transgender, which it feels like to become a transgender whatsoever and I never thought I wanna be a transgender or a femboy, however, it might be fair enough and I wanna say that my gender is male it's because I was born as a male, but speaking of that.
For my opinion I am claimed as a furry husky girl for planning to be born as a female for starting a new life as a newborn furry husky girl, but born into wealthy family and pretty much, but after I come back as furry husky, my entire body will be trapped inside, which it's covered with fur where my weight is healthy, my body fat is healthy, my muscles are strong, but not like being a muscular guy, my feet is average size similar to my current feet size, my voice is normal pitched sound, which its middle range, and my height is little bit above 5'9" or 175 CM so my height is 5'10" or 178 CM or maybe like 5'11" or 180 CM something like that, so yeah, which my current height is trapped inside and regardless of that, I'll have lack of fear too as well, which I'm brave and yes, pretty likely for me I'll be wake up from the different reality in the bedroom military facility base, including with dozens of PCs, PC parts, which you can build a pc and run for it, monitors, and laptops, which it's located in those storages, bedrooms, private bathrooms like small bathrooms with a bathtub and a shower, just a shower only, bathtub/shower combination, or without a bathtub and a shower it depends whatsoever, public restrooms, which it has many of these all-gender public restrooms, but not all of public restrooms are all-gender, which many public restrooms that are separated between as men's restroom and women's restroom, universal locker rooms, and more, but the location is in desert area where it has 15 sectors, which it's similar to the Black Mesa Research Facility and it's located in Black Mesa, New Mexico, U.S. from Half-Life. Three of these last sectors are military base sectors where it's located to the near underground research facility, which it's a huge base, but still claimed as a furry husky girl to be born into a wealthy family with full identity, but it will be different, which first and name in English and the middle name in Russian.
Proof that everyone is an anthropomorphic animal in the furworld have plantigrade legs and feet, which are shaped like a human's feet usually.

10th of March, 2025

Over the last few years when I was in middle school this was my first time going to auditorium, which it's part of a school for the play where the high school is located like the near small town in Moore, Oklahoma and for that time I was so afraid of high ceilings and it does makes me feel uncomfortable to watch because it just feels unsettling for me it is, but it was back in late 2018 before the COVID-19 pandemic and unfortunately for that, I know it sucks for today to go to the auditorium for the play, concert, assembly, lecture, or ceremony if you're scared of high ceilings, so it makes you feel unclear for this bullshit, but in my opinion I've been to school auditorium couple times during in school days, but unfortunately for me, I recently did try not to be afraid of high ceilings if I look up, so it would be feel unsettling, but speaking going to school auditorium for a play, concert, assembly, lecture, or ceremony where it has a high ceiling.

So Back in January 2025, it was my first time playing *Half-Life*, but the original one it's released in late 1998 since that game is only 26 years old, so yeah, that game was released back in the day before when I was born, but 3 years from now on in 2028 that game will be 30 years old, however, it's not a new video game, it's an old video game and by the way for that, it was my first time playing *Half-Life: Opposing Force* and *Half-Life: Blue Shift*, which two of them are expansion packs for the original *Half-Life* the 1998 first-person shooter game, but speaking of *Half-Life*.

When I was younger I used to play many of these kinds of online games back in the day and it was one of my lovely things on the Internet when I used to play a lot of online games back then, so yeah... it's just a little story about my childhood years in the past and speaking of my early life stories.

I know my entire life has been changing through many years, where I shift into different things a year, after year, after year, after year, and after year, however, this entire planet has been changing for so many damn years, it's always changing, it's always different, it's the past, it's the present, and it's the future, but we all know most people are unpopular, which most aren't famous whatsoever; unpopular ≠ unimportant, we all know most people aren't rich, we all know people who also have good mental health conditions, we all know people who also had a horrible mental health condition problems, we all most people are undocumented, which they aren't famous or infamous whatsoever; undocumented ≠ unimportant either, we all know most people are unidentified, which they aren't famous or infamous whatsoever either as why, we all know many people have a lot of money, we all know some people are poor except when they are in school, ended up being homeless, or living in poverty life, we all know some people are public figures, we all know most people are private, we all know early life information about most people are not available to the public at large, we all know many people have been done doing bad things for committing a crime, we all know people live their own life for being loneliness, we all know some of these people did become famous or infamous whatsoever, we all know everything, and we can all agree that everyone is different and proof that this world is so tough for everybody on this planet, but like I said before, it's on my previous page document where I wrote about one month ago about me continuing to be 60 minutes away ahead of everyone else for my afterlife plan and you will continue to consume your minds to understand to step foward for your own life. Never ever give up, life and time often goes faster than we think.

17th of March, 2025

So for that time my mental health has declined only sometimes, but it happens to me these days and I know it does feel pretty unbalanced for me sometimes when my dad saying those disgusting things to me instead, and it does make me end up being worried and crying, which my mental health has declined for no reason.
About a single year ago when I was in 11th grade I use to write those inappropriate letters and give it to other people in school and I use to giveaway stuffs to other people in school like diecast vehicles and other kinds of things, however, regardless for doing bad things, I stop giving away things to other people and give the inappropriate letters to other people in school 'cause I never wanna do that anymore, so yeah, enough is enough for this bullshit cases that it's a crime and by the for that, I've been lookin' up those deep, dark, depression things on the Internet too much and I do not know I did that and unfortunately about one year ago, I also had a horrible response from my dad, which my dad saying those disgusting things to me about planning for committing a crime whatsoever, so I decided I had to like stay away from it, where my house has gun safes and knives and does feel extremely disgusting for me it was since my mental health have been declined some point, whichever it feels.
Man... I hate those goddamn people purchasing firearms for the home defence like these people buying AR rifles, shotguns like Mossberg 500 series, Remington 870s, and other kinds of shotgun models, or handguns, however, I just can't trust about these people living in their house where it has a gun safe, which it has guns inside and it safe to say better have to stay away from it, so yeah, it sucks so badly 'cause it's pretty hard to live and it's dangerous for no reason, apparently, for that not just the United States of America only, but around worldwide where many countries do have those people have their firearms for the home defence, but in fact there are some countries are prohibited where civilians are banned from obtaining longs guns or handguns due to civilian firearm ownership is heavily restricted to reduce gun violence for some point, so yeah, but in my opinion, it's true and proof that I there's a lot messed crap going on in this entire planet and the Internet too as well and I wanna say this; you better have to be careful what you're visiting a website and lookin' up for on the Internet, especially for that don't visit these weird, deep, dark, depression websites and don't ever look up these weird, deep, dark, depression things online and yes, there is a lot badass things on the Internet and there's a lot of badass things on Wikipedia too since you better have to stay away from it what you're lookin' up for.

27th of March, 2025

In my opinion, I strongly dislike having my stupid nickname in Japanese when my mom calls my nickname in Japanese for every day and I would've thought about I have a nickname in English so my nickname is Steve so it would be my dream if I had a nickname Steve, however, back in the day I did had previous nicknames as a young person when I was like little and yeah, it's in a past for so many years ago and I know it makes me feels so uncomfortable when my mom calling my nickname in Japanese and it feels like it does suck when I keep my nickname in Japanese, so yeah, but speaking of changing my nickname.
I would like to make these kind of afterlife realities, but those kinds of realities, universes, and theories more like possibility a single universe, however, instead of that, I would name the title so it would be "Singular Theory Separation" and yeah, not like a multiverse belief, but only a singular reality belief, which is only one single dimension for some point so I would create 6, 7, 8, 10, or any kind of number so the maximum number would be 20 singular reality dimensions and yeah, I would say it, but that's my opinion. Over the last few years back in late October of 2018, Chris Chan made a announcement about the dimensional merge where she believes in multiverse theory, particularly of idea that fictional universes are real and parallel to this universe more like this reality, so yeah, allowing fictional characters to interact to this universe and this world so she would join it for real after she died, so yeah, she would communicate with many of these fictional characters in real life, which Chris Chan believes in both C-197 & 1218 as the ideas of her dimensional merge theory for planning to escape this reality and in my opinion, I'm planning to escape this reality too, where this entire planet has so many tragedies since there is a lot of messed up crap going on in this world and the Internet has a lot of weird, deep, dark, depression things in this goddamn reality, so yeah, I just can't trust about it so in my opinion, I am claimed as a anthropomorphic husky girl to be born into wealthy family from different, but after I transitioned into anthropomorphic husky where my entire body and head is trapped inside, my skull is trapped inside transitioned into a husky skull, covered with fur, which the colour of fur is black and white, my brain is average, which my brain is trapped inside where I never diagnosed with, my current height is trapped inside so my height is 5'10" or 5,11", my voice is a normal pitch where it's bit lower, my feet size will be same size where it's compared to my current feet size, my memories and knowledges will be faded away, and brave of everything, which I have lack of fear, and where I have triple tails, so yeah, where I will be waken up in the bedroom in the huge underground research facility military base, but similar to the Black Mesa Research Facility, which it has military research laboratories like medical research laboratories, technology research laboratories, weapon research laboratories, electronic warfare research laboratories, and other kinds of military research laboratories, few room storages with dozens of PCs, PC parts you can build with, monitors and laptops, private bathrooms, all-gender public bathrooms, and traditionally divided Men and Women public restrooms, bedrooms, administration, weapon safe rooms where it's located in training for a shooting range, and more some of places, but the area sectors are different, which it has above-ground and underground sectors so I would live for a while about couple years left, where I worked as a engineer, inventor, & PC builder, which I'm wealthy, including with my dogs, Frankie, Al and Hina & Lily as twin sisters the 3 decades long lifespan dogs, including with Al and Hina & Lily's twin sons, parents, and stepfather, but almost everyday they don't panting, which they are living in the different bedroom, but not the same bedroom where they live except Frankie and Al and Hina & Lily's twin sons, where I woke up in the new dream, but still claimed to be a furry husky girl and the year is 1998, but after I woke up in the new dream so I'll say like "Humanity are the most messed up creatures on the planet Earth and unfortunately, the Internet are the most messed up things in the observable universe too." so I would say it after I woke up, but I would meet with anthro goddess for 60 minutes away ahead so It would take a while and yes, the goddess as a anthro kitsune or wolf will sent me here for 60 minutes away ahead so it take a while before I go to the big teleport to travel to the Furuniverse and wake up in the bedroom in the huge underground sectors in the research facility military base, which that military base is very famous for its high security, underground people movers, underground trolley buses, research laboratories, military vehicles like military trucks, tanks, and other kinds of military ground vehicles, training, and other kinds of maintenance, storage, and development on Furworld where no humans exist in the Furuniverse since everyone is a anthropomorphic animal have hands shaped like a human hand, plantigrade legs and feet, which their feet shaped like human feet where furries exist, but in different real life existence, not in fictional existence, where everything won't be the same except some of holidays, some of firearm models like some of rifle models like AK series rifles, but it will have different modern AK rifle models, M16/M4/AR rifles, G3 rifles, SKS rifles, and other some of similar models, but not most of them, some of machine gun models, some of LMG models, some of SMG models, only very few of shotgun models except SPAS-12s, which it has been highly produced use for military use just like on the video game, and some of handgun models, which some firearm models are similar to this reality, so yeah, most of them except some of military use firearm models and most of civilian use firearm models don't exist where most firearm models are generic type, but I'm not going to talk about model firearms as hobbies and I just discussed about real guns, which some of these real firearm models are similar and mostly are generic type, however, many (anthro) dog breeds (as species) coexist and most don't coexist, almost of every languages are fimilar, but some of languages are different, and some of others like some of similar vehicle models like truck models like the International S series between the truck and bus chassis and only very few of military, medium duty, heavy duty vehicle models, and aircraft models are similar to this reality, but the brand is different and mostly vehicle models are generic type, which its manufactured by different brands, so yeah, every brands aren't the same, Internet aren't the same, events aren't the same, political leaders aren't the same, counties, countries, provinces, regions, states, territories, zip codes aren't the same, cities, towns, villages aren't the same, and most of everything aren't the same that way and yes, most of everything are different, lesser amounts of tragedies, lesser criminals, only very few dark things on the Internet and the outside of the Internet, no creepy phone numbers, and most dark and disturbing things don't exist, which mostly there's a lot of good and positive things on the Internet and the outside of the Internet, and laser tripmines actually do exist, which it's designed and highly produced use for military use, so yeah, that's my perspective thoughts for my afterlife plan so I would name the different reality so it would be "FU-200D", where it's a part of FU-200 and the population on Furworld is over 50 billion people, which the Furworld's population reached 50 billion people in 1998, where the anthro canine and anthro feline population are rising since in the late 20th century, which the planet Furworld is several times bigger than Earth as a human planet and chances are generations years, by birth years are different, but in the Furuniverse as of alternate reality there are 11 planets in the Furstar System, but there are 2 belts, apparently, there are not like asteroid belt, but there are tiny paw stars in the 2 belts in the Furstar System where the sounds of canines screaming and crying since the sound is extremely noisy, the one paw of god is exist, and infinite numbers of galaxies, which is a insane number and yeah, but for that time this is one of my longest writing online journals I've ever written for my entire life.

6th of April, 2025

Boy... I always hate carrying these heavy things and it absolutely sucks so badly to do it for me and it makes me feel so tired of this bullshit since it feels like I just don't wanna do this ‘cause I just never like helping with my parents for carrying heavy things and speaking of carrying heavy things like whitewoods, concrete stuffs, and other kinds of bullcap, however, I'm so tired of it about Google wanted to me recover some of my inactive accounts for waiting 48 fucking hours, where my YouTube channels and my other accounts on other platforms is archived and it's pretty frustrating for me it is like why the fuck do I have active some of my inactive accounts? I just can't deal about it and yeah, it happens sometimes and it does frustrates me sometimes so this is why I’m caring about my main Google account, which I’m active, however, somehow instead, in my opinion, I don't really care about recovering some of my inactive accounts to active on, which it's archived by me and fortunately, that's my opinion and typically, speaking of recovering a Google account since it's inactive where accounts on other platforms is archived.
As a late night I was planning to record a full gameplay video of an 2 parts of an original Half-Life and then record a full gameplay video of an expansion pack ones Opposing Force & Blue Shift one and then schedule to upload on YouTube manually for some point, but I tried my best as I can and there's no way I wanted to record a full part gameplay video ‘cause due to my parents for lack of time and resources and it does feels so dipshit, however, at least I have to like skip breakfast, lunch, or dinner for making a long play video to get like many views as possible and yeah, but unfortunately, I just can't deal about my parents wanted to me do something and it does feels so overwhelmed for me it is, dinner is overrated, school is overrated, houses with a gun safe, which it has guns inside is overrated, earth is overrated, and being trapped inside of the house is overrated and yeah, I would imagine that I wanted to escape Earth in this entire universe for my personal struggles since I would like to create the alternative world map of all of the surface of Furoria sometimes called Furworld, where the planet Furoria has have 10 continents, 7 oceans, and at least like 120 countries or more than 120 countries something like that, so yeah, but usually it's not limited, it’s not invalid, and it's not the end and yes, it's endless, grief, pain, unlimited, and valid for somepoint, but in fact, it's not a fictional, it's a different real-life form, and it’s an alternate reality, which every colours are the same, apparently, it will took me a while to create a planet Furoria, where 4 collective terms of furry species on Furoria is exist.

14th of April, 2025

In my opinion, I always wanted to make much money on YouTube it's because I have my Google AdSense account I can make money off of it so why not, apparently, when you upload a video to write a bad title and description with a bad video thumbnail to get low views if you are a small YouTuber, so yeah, not a job and when you upload a video to write a good title and description with a good video thumbnail to get many views if you're a quite small YouTuber or a big YouTuber, so yeah, it's a job to do, but in my opinion, I care mostly about YouTube, but being a small YouTuber is not a job to do, where small YouTuber's videos have mostly low amounts of views for making poorly made production with bad title, description, & thumbnail for making low amounts of money and yes, it's not a job to do, however, if small YouTubers try their best to work hard instead, so yeah, they'll get many subscribers as possible, apparently, chances are YouTube is a job to work to do and if you wanna be successful YouTuber, so you have to work hard to make a video and then upload it on YouTube with a good title, description, and thumbnail to go viral to get many views as possible to make much money, so yeah, but true and there are many of big YouTubers and small YouTubers out there where some YouTube channels have well-known names and some YouTube channels have lesser-known names except when the YouTuber is being well respected or disrespected, so yeah, at least you make video and saying these respectful things for being positive, but in fact, when you make a video, including with a sponsorship, so yeah, the sponsorship is featured on the YouTube video due to its promoted, but usually I don't meant that I hate YouTube sponsorships, I'm okay with them and there's some of sponsorships are scammers since better have to be careful with that, but in fact, true and I always care mostly about YouTube, but unfortunately, being a small YouTuber is not a goddamn job to do like finding easy ways to work to make a Video like on mobile phone or computer for being a solo person to get low amounts of views and yes, it's not a fucking job to work to do.
I know there are some of mainstream YouTubers out there where some of YouTubers did achieve mainstream recognition like MrBeast he's the biggest YouTuber in the universe, PewDiePie he's the biggest gaming YouTuber, and some other mainstream YouTubers, so yeah, but usually being a mainstream YouTuber means have to work extremely hard as possible and yes, literally it takes so much time to become a one of the most influential YouTuber like featured on National and International News outlets, so yeah, that's all what I had to say.

17th of April, 2025

In my opinion, I’m no neither as religious nor agnostic because I always don’t identify myself as a religious or an agnostic, but in fact, I don't believe in heaven, hell, God, nor nothingness, but regardless, I never thought I want to talk about too much about religion and back then I used to like identify myself as an agnostic or unknown for a while since I don’t remember and about one year ago, I really did started believing in furries where it's just a fandom for beyond that point since like early 2024 before my 19th birthday and yeah, it’s been a while ago, but in fact, I always do believe in furries in real life because I’m obsessed with furries, it’s not just a fandom, it’s real, it’s the existence, and it’s an alternate reality for searching these ideas and stories, where living in the better world than Earth in the observable universe, which Earth has a lot of awful things going on and where there's a lot of badass things on the Internet in this entire universe and it’s dangerous for some point, but proof that I am not joking.

Generally, I always claimed to be a anthropomorphic Husky girl to be born into multimillionaire family for net worth of over $40M for having a new family and new parents in age early 20s, which both of them are being famous like the father who is a filmmaker & the mother who is an author and usually I believe that two-step reincarnation is in fact, real and so that's why I'm always 60 minutes away ahead for planning to be reincarnated as a furry husky man, which everything won't be the same that way, everything’s different, it's a different reality, where I’ve been developed my own afterlife theory, it's not based on religion, it's a custom-built, which I’ve been created 11 planets in the Furstar System, tiny paw stars in the Furstar System, One paw of God, which it has collections of galaxies, and everything else in the Furuniverse where it has infinite amounts of galaxies, nebulas, superclusters, paw of gods where galaxies is inside, and some of more of space objects, but without any black holes exist and it includes with supernovas into giant foxes, wolves, and dogs of gods, which these supernovas turned into a giant canine the nebula of god where it's exist in space, but it's in the Furuniverse and imagination of deep influence the minds of animals, brainwash the minds, and better living than Earth, which everyone is an anthropomorphic animal have human-like bodies, plantigrade legs, and plantigrade feet, which their feet shaped like a human feet on the super-Earth planet Furoria, in which its developed by me in some of these page documents based on the Furry Selection Basement Journals, which it’s written and created by me, but in fact, not just me only I will join, but the other people will join it for real if they are furries or non-furries and yeah, maybe like at least hundreds, thousands, hundred thousands, millions, or multi-millions will join it for real if they’re interested in, so yeah, it’s just a real prediction about the Singular Theory Separation, which it’s only a single dimension, so they will choose which one they want to join for real.

29th of April, 2025

Last night I had a dream about where I met MrBeast the biggest YouTuber on Earth in real life and these MrBeast fans I have seen it too, which it was a shocking crazy damn dream and I just can't believe that, so yeah, sometimes I had dream about in school, sometimes I had nightmares, everyone has crazy dreams sometimes, and everyone has nightmares sometimes, but it depends and we all know that sometimes people had a dream about meeting celebrities last night, which is a crazy dream, but in fact, sometimes I had crazy dreams where I meet celebrities too, like I had a crazy dream about I meet Donald Trump the richest U.S. President in real life about few months ago back in late-2024 maybe like in July 2024, August 2024, September 2024, or October 2024 I had one back then I don't know I can't remember and yeah, it was a crazy dream I had about few months back in the year 2024 during these days when I had my mental health declined due to its mental illness, which I had too much fears, anxiety, worrying, and panicking a lot of times before I make it go away for thinking of some sort of like violent things and yeah, it's in a past about few months ago and we all know everyone has good dreams and we all know everyone has bad dreams and speaking of sleeping dreams, my mental health, and my memories.

I'm almost done writing about the The Three Habitable Planets In The Furstar System In The Furuniverse The Alternative Real-Life Form From Different Reality Encyclopedia and took so long to write about my beliefs about living in the different reality for an afterlife how it look like, which is pretty harsh though and yeah, due to its the time going quickly and it feels so disgusting how the time goes fast and sometimes it makes me feel disgusted about the time, but as I said; it's a hard to write the encyclopedia document about The Three Habitable Planets In the Furstar System In The Furuniverse and it's a topic About the different reality, which the super-Earth planet has fewer amounts of tragedies and Internet is the safest thing in the Furuniverse, but unfortunately in this reality, there's a lot of badass things on the Internet and a lot of messed up shit in this world, they've been murdered and injured so many people and animals, so many lives were lost and almost lost and the list goes on actually, so yeah, the world is pretty fucked up, but there a lot of good things too and chances are I'm not going to talk about this reality, but I'm taking about the different reality, which its based on the encyclopedia document page at least I have to like get it done soon as possible, so yeah, but in my opinion, I recently do not know what else to say that much in publicly and that's pretty much it what I have to say.

3th of May, 2025

2 years ago back in April 2023 I did upload the MTL Sherman Fire Truck mod on ModLand after I modify it and got over 40,000 downloads, which is pretty insane and yeah, I haven't update any version of my most downloaded mod 'cause due to its lack of inspiration where I shift into modifying mods for American Truck Simulator, but mostly of them, so yeah.
It's been going pretty well recently and I have been doing a lot of hard work at least I've been tried my best to modify it in right way to be honest, but in fact, I've been quite famous/infamous for a while since 2022 I've become quite well-known except mostly recognized of my username FurryManforme1976, which I was a somewhat anonymous person for a while, but back then I used to own a black Labrador avatar picture, which I made that kind of custom avatar from Avatar Maker: Dogs app, a letter F avatar picture with a blue background, where I've made it back in late 2023, and a paw print avatar picture with a blue background too as well, which I've made it back in late March 2024, but generally for that I strongly disliked being an anonymous person, which apparently, it disgusts me a bit and there are so many modders do stay anonymous because they don't want to reveal their faces and identities it's because it's a privacy.
In my opinion, I will stop activating on ModLand, Modsfire, and Sharemods because being a modder is not a job to do at least you make low amounts of money on Modsfire, Sharemods, and other non-direct monetization mod-hosting websites for uploading a one mod file, but uploading vehicle pack online for uploading many mod files means making more money than a single mod file, which is sometimes it can be a job to be honest and like I said, being modder is not a job to work to do expect I would decided that I wanna shift into YouTube and social media to get many followers as possible if I have chance, apparently, someday in the future it will be my last year for being a modder so I will likely stop modifying mods, so yeah, someone will modify my mods, which it was modified by me and I didn't forget to give credits for other users for its due. When I create my mods that are based on or modify the of other users or other people, but if I forget to give credits for other people, so it will cause serious allegations of plagiarism, backlash, and misrepresentation, which is a failure and huge mistake since it might hurt a lot of people, but not all of them are mine though, where I did re-uploaded it and published it online, which I didn't forget to give credits for other users and I did published vehicle packs online where I did took it and published it online, apparently, they are not all my stuffs, but on my opinion, I don't know who that is, so yeah.

6 of May, 2025

Yesterday when I was in school during the Cinco de Mayo Day, The Extinction Trials final quiz work is one of the most difficult quizzes I ever taken and it makes me so much stress, frustrating, and anger and that kind of quiz work isn't that easy at all, it's too difficult for me it is and it was after done reading The Extinction Trials book about 4 days ago and I just can't remember where I read it, which I have a bad memory about The Extinction Trials reading 'cause I just don't remember and it kinda sucks, but I know I do have bad memories about some stuffs like reading, and some of other things I don't remember, so yeah, unfortunately, it was a goddamn pain in the butt it is and at least I tried to do it best to redo all of quizzes, which some of them I got right to finish the most difficult quizzes so I'm good, but it does sucks so badly like why that final quiz work was so hard to work to do?! Man... this was unfair!

SO UNFAIR!!!

9th of May, 2025

So according on the news, India & Pakistan started declaring drone strikes, missile strikes, and air strikes on Jammu and Kashmir after India & Pakistan declared standoff, which is an "act of war" after the massacre in Baisaran Valley near Pahalgam, Anantnag District, Indian-administered Jammu and Kashmir, but usually India and Pakistan have nuclear weapons, which both of them have been built nuclear weapons for a while, but if India & Pakistan will start a nuclear war, so yeah, it would be catastrophic on a global scale and it would be so much worse since more than hundred million people will die and it would be huge sad, but unfortunately, there's still ongoing political and territorial dispute of Jammu and Kashmir, which Pakistan & China are still administered Kashmir, which it has been ongoing for so many damn years after India and Pakistan gained independence after WWII ended and speaking about according on the news about the conflict.
I heard that yesterday Robert Francis Prevost known as Pope Leo XIV was elected as the 267th Pope of the Roman Catholic Church, which as he is a first American man who became a Pope of the Roman Catholic Church, which it was according on the international news after Pope Francis died for having a stroke and heart failure, so yeah, it was back then about two weeks ago after the 30th anniversary of the Oklahoma City bombing, which it was according on the international news coverage and right now Pope Leo XIV is a latest Pope of the Roman Catholic Church in Vatican City, but in fact, he's not just a U.S. citizen, but he is a Peruvian citizen, which as Leo XIV is a dual citizen, so yeah, he is a legend leader and it was a greatest event I've been noticed, but it was extremely significant and relevant.

16th of May, 2025

Man... the time goes so fast for nowadays and sometimes I’m so exhausted like during school or home nowadays, apparently, at least I tried not to get too tired, stressed, or exhausted and for that time I can't trust about school, I can't trust about people have guns at home for a home defense, I can't even trust about living my own life for being loneliness where I do work hard myself alone, I can't even trust about those students hanging out in the bathroom during school days, I can't even trust about these difficult schoolworks, I can't even trust about being trapped inside the house, and I just can't trust about guys either, where many guys have a weird facial hair, axillary hair, and body hair, it disgusts me a lot, but it's unclear and misunderstanding, and whenever the hell I feel, it's unprecedented and unexpected... In my opinion, I’m going to live in a much better place, which is the Furuniverse reality for two-step reincarnation, where I wrote in my journals and made the concept art of what living in a different reality will look like. I always strongly disliked being a poor person so much, and I know I’ll be happy for living in the different reality to live a happily ever after in the Furuniverse for being reincarnated as a furry husky man before I would be reborn as a furry husky girl, but born into rich family multi-millionaire famous family, which the time goes normal and balanced for living every daily life and I know most people on this planet aren't famous, rich, and popular and it's true. I know it seems like the time is passing too quick for me and it does make me feel like I'm unmemorable, but it does feel like it's such a worthless piece of crap to live in and as I said, I’m going to the Furuniverse reality one day after I die, which is a much better place where I wrote in my journals and created the concept art for my story for my ideas and stories where I will join it for real and I hope you will join it for real too so you should believe in the Furuniverse reality for real.

25th of May, 2025

Unfortunately, sometimes my mom did say the same thing, which she repeated it to me where I said it and said these messed up things to me and I do not like it that way, which is pretty disgusting and disrespectful and I know it is not okay, I know a lot of times people in this world are negative for saying these messed up things, which is a disgusting act to say in negative way, but a lot of times people in this world are positive too as well and chances are everyone's different, we are all different, not everyone is the same, not everyone is similar, not everyone is familiar, and not everyone is unfamiliar and that's okay and today I just had Lunchables nachos cheese dip & salsa with a Capri Sun drink and the Kit Kat bar for a late snack after 4:00 PM before dinner and I was so pissed off at my mom, which I didn't like that kind of her response and she did say the same goddamn thing where I said it and she said these messed up things like eating unhealthy everyday, which I did not like that way, it was pretty, rude, disrespectful, and disgusting it is because I did had enough and I was so sick and tired of my mom saying these messed up things, which it did make me feel go off for no reason.

31st of May, 2025

11 days ago I just graduated high school, which it was pretty awesome and I was bit nervous about it because it's a semi-private and semi-public ceremony, which it was located in Lloyd Noble Center in Norman, Oklahoma near The University of Oklahoma, but the basketball court in Lloyd Noble Center is so huge and these ceilings are so high and does look like a arena to me and yeah, but for that time Aiden told me that he's going to be a filmmaker and Slade told me that Lauren is not going to graduate this year because she doesn't have enough credits to graduate due to too many absences, so yeah, next year she's going graduate next year with Andy in 2026, which Slade did told me, so yeah, it was like 12 days ago, which it was rescheduled in 20th of May due to the bad weather at evening in 19th of May it's because it got cancelled in evening. I know sometimes graduation gets cancelled due to the bad weather, especially rescheduling it for tomorrow and that's all I had to say for now on.

The Three Habitable Planets In The Furstar System In The Furuniverse The Alternative Real-Life Form From A Different Reality Encyclopedia (With Extra Encyclopedia)

by Stephen Flint AKA Rinty SkyCoyote (Updated in 09/25/2025 & Edited in 12/12/2025)

In the Furuniverse reality, there are 11 planets in the Furstar System it's because the Furstar System has 1 dwarf planet, 5 jovian planets, and 5 terrestrial planets, but three of them supports life, Huskarra 3rd planet, Furoria 4th planet, and Velirum 5th planet where the triple terrestrial planets supports life in it, the population on Huskarra has over 77 billion people because the population on Huskarra is growing extremely fast and usually the anthro species on Huskarra is anthro huskies, other some of anthro mountain dogs, anthro dire wolves, anthro white wolves or anthro arctic-like wolves, anthro white foxes or anthro arctic-like foxes, and anthro white kitsunes, where anthro Huskies are the one the largest population, anthro white foxes or arctic-like foxes are the 2nd largest, anthro white kitsunes are the 3rd largest, anthro white wolves or anthro arctic-like wolves are the 4th largest, anthro dire-like wolves are the 5th largest, and some of other anthro snow dogs are the 6th largest, but usually, including with every snow animals on Huskarra, buildings, technology, snow vehicles, where it's like living in the future, which some are futuristic and some are modern, no weapons, which they can play with toy guns or water guns, and no tragedies will ever happened since Huskarra is highly advanced, peaceful, and prosperous society where every anthro furry canines on Huskarra have their fur on their bodies are very warm, have plantigrade legs and feet where their feet shaped like a human, every anthro furry canines have human-like bodies, which is same to the population on Furoria, only two genders male & female, but all of males and females on Huskarra don't feel any pain or hurt in their bodies and don't feel any fear because their bodies are weapon-resistant for their body shield, including with werewolf population too where werewolves don't feel any fear and pain or hurt either because their bodies are weapon-resistant for their body shield too as well, apparently, most of many of anthropomorphic animals on Huskarra have their hair on their heads, but not everybody though and the native language on Huskarra is Huskarran, Japanese (only anthro white kitsunes), Russian, and Varnuk, apparently, Huskarran & Varnuk language script is Fur'maya script, where that kind of script does look like an alien language script or Cyrillic script, however, it depends on, but both similar language names are completely different and usually both similar languages pronunciations are very different, but it has cold weather, snowy, icy small rivers, two paws of frost land is located in middle of Huskarra, and some of other cold stuffs in it, but usually for that, Huskarra is a 3rd planet in the Furstar System, which is a 1st habitable planet in the Furstar System, but it is 4.9 times bigger than Earth and it's a cold terrestrial planet, where it has snow anthro furry canines, snow animals, futuristic buildings, modern buildings, futuristic snow vehicles, modern snow vehicles, technology, which that are futuristic and modern, mountains where it has no volcanoes, no weapons, and some of other things on Huskarra like mostly some of cold things, highly advanced, peaceful, prosperous society, and no tragedies and the inside of the homeworld planet Huskarra it has cold mantle, outer core, and inner core where the colour of inside of Huskarra is blue, light blue, and white where it's glowing and cold, but it contains a cold solid inner core, liquid outer core, solid mantle, and the thick crust, which as the climate change in Huskarra won't happen.

4th planet of the Furstar System is Furoria, the super-Earth planet is 5 times bigger than Earth and 2.08 times bigger than Kepler-22b, but it's a Earth-like and it's 4th planet in the Furstar System, which as the 3rd habitable planet in the Furstar System, but there are 10 continents & 7 oceans on the super-Earth planet Furoria, starting with big to small size of continents; Xianyora, Zulekore, North Auratheria, South Auratheria, Glacithra, Nordicavire, Darrakoon, Pawveria, Clawsha, and Halimah and starting with

northern oceans, middle oceans, and southern oceans; Northern Oceans: Slytherian Ocean & Elyvian Ocean, Middle Oceans: Veykara Ocean, Numirian Ocean, & Orinave Ocean, Southern Oceans: Duskarin Ocean & Glacithric Ocean and that is all of 10 continents & 7 Oceans and there are over 20 countries on Furoria, which there are 7 federal countries and 15 unitary countries it's because there are only 22 countries on Furoria. All in all, Furoria has 10 countries that use left-hand traffic and 12 countries that use right-hand traffic, but all of the countries on Furoria are completely prohibited for civilian use from obtaining handguns, long guns, and other weapons for violating civilian weapons policies due to the government restrictions. On Earth, there are nearly 200 countries and over 7,100 languages spoken, but history of Furoria is completely different than the Earth's history because it's not the same, but there are little to no amounts of tragedies, which there is no pandemic outbreaks, wars and conflicts on other countries like ongoing civil wars, natural disasters like earthquakes, volcanic eruptions, tornado outbreaks, other natural disaster outbreaks, other kinds of accidents, incidents, and outbreaks that occurred, no extremism, no terrorism, no war, little to no deadly terrorist attacks, little to no deadly shootings, little to no amounts of school shootings that ever happened, and there's no mass shootings because it's an extremely peaceful super-Earth planet, apparently, there's not a lot of messed up things on Furoria because it has an extremely peaceful society because Furoria is utopia, however, it has Peditran/Therian population the largest on Furoria, Altertherian population the 2nd largest, Berdoron population the 3rd largest, Primatarin population the 4th largest, 50% are rich, 49.5% are middle-class (mostly upper middle-class or almost rich, but depends on), 0.5% are poverty (almost for sure), 50.5% are famous, 49.5% are not famous, only very few are infamous, 30% are lefty, 60% are righty, and 10% are ambidextrous, which mostly of Peditrans/Therians & Altertherians are righty, Primatarins & Berdorons are mostly left, expect many of Berdorons are righty, and anthro lemurs are righty too, but mostly of many Berdorons are lefty and only very few of Peditrans/Therians & Altertherians are lefty, many of Primatarins & Berdorons are ambidextrous, and only some of Primatarins are righty, such as anthro lemurs it's because most anthro lemurs are righty and there are little to no amounts of high-profile criminals where they achieve mainstream recognition and didn't achieve the mainstream recognition like some of anthro ducks, anthro monkeys, anthro chimpanzees, anthro gorillas, anthro pigs, anthro hogs, and anthro goats who have committed their crimes, but there are only few criminals in the entire U.F.S. (UFSOA) because there are little to no crime at all and there are little to no amounts of jails & prisons in the entire Furworld, but there are big cities with skylines, medium cities, small cities like small towns or village towns and it includes with a huge military research facility the underground laboratory and military base kinda like science fiction look is located in Port Combine, New Somborerio, United Federal States of Auratheria and shares with an international border with Somborerian states, which the U.F.S. is the federal republic country has 100 states and located in North Auratheria; it's a HIVAC Port Combine the very famous underground laboratory and military base owned by a HIVAC or Hazardous Infectious Veteran Armed Corps primarily affiliated by the Ducklandia Army & loosely affiliated by the Ducklandia Marine Corps, but not an obvious part of Ducklandia Navy, however, it's particularly similar way as a Black Mesa Research Facility in Black Mesa, New Mexico, United States, but it's a fictional underground laboratory, but not an exact copy and it's very famous for it's Port Combine personnel employs in its facility within 5 group employees: HIVAC military personnel, HIVAC military security personnel, invention personnel, science personnel and security personnel, science team, invention team, high security, which usually high security guards wear with blue shirt, black tie, dark blue pants, black military boots, equipment belt, armor vest, and helmet with safety glasses more like a police motorcycle helmet for use for protection or without a helmet, but usually they also wear ID badges as well, armament of Port Combine Security Force (affiliated by the United Federal States Security Forces) uses M9s, Glocks, M1911s, M92s (same model as Beretta 92s), P-series pistols (called the Prichett pistol), One Beagle Pistols (same model as Desert Eagle), magnum revolvers MP5s, AR-15s, Ar-18s as semi-automatic rifles (which R1 battle rifle & M75 assault rifle is both based on the AR-18 style rifle since they produced ten millions of them), SPAS-12s, and pump-action shotguns, which they use just one or two it depends on, which they

keep the long guns on these security cars, security SUVs, security pickup trucks, security armored trucks, which obviously, similar to SWAT armored trucks (sometimes mounted with autonomous sentry gun on the roof if needed), and security vans, but sometimes, which similar as Ford Crown Victorias, first generation Nissan Pathfinders, & Jeep Cherokees, but not an exact copy, where these car models, SUV models, & truck models, where they replacing for, which as it's ready to retire for using over a decade, but there are many of HIVAC security vehicles are right-hand drive it's because they are made in Ducklandia and basically, they have red & blue emergency lights & sirens, they're similar to police interceptors, and they're fully autonomous because for its advanced and revolutionary, autonomous people movers with a male voice autonomous announcement system for going through the underground, including with elevators, autonomous electric trolleybuses with a male voice autonomous announcement system for going through underground, research laboratories, freight yards or train yards, Military vehicles, including with APCs, military buses, military helicopters, military planes, tanks, and military trucks (many of military trucks in HIVAC Port Combine are right-hand drive because they are made in Ducklandia), dormitories, training (because HIVAC Port Combine has a Sector A-1 Training Center, which it can train with Hazardous EnVironment users & security guards and the HIVAC Unit Training Center, which it can train with HIVAC security gaurds & HIVAC soldiers), team survey room, including with the equipment storage room the huge weapon storage safe room where it has dozens of weapons for the collection and it contains with ammunition, grenades, laser tripmines, including with BS Solvalous and M27s, which it's similar as HECU laser tripmines, which M23B is indeed the laser tripmine from Half-Life, sentry guns, including with M80 Striders & M174 Shepherds, C4 explosives, LMGs, including with M240s, M249s, M60s, & M67s, assault rifles, including with M75s, M16s, & M4s sometimes equipped with a grenade launcher, battle rifles, including with FALs, G3s, G76s, & R1s sometimes equipped with a grenade launcher, SMGs only MP5s sometimes equipped with a grenade launcher, semi-automatic rifles, shotguns, including with SPAS-12s, pump action shotguns, and semi-auto shotguns, rocket-propelled grenade launchers and some of more of other weapons in the equipment storage safe room for extras and not just only located in Delta Therian Complex, but couple of equipment storage safe rooms are located in some military place sectors, where its owned by security guards, which it was sent by the military, but until it will be completely removed in early 2000s, cryonics where it's located on the Advanced Cryogenic Research Lab, but if what happens if furries believe that they will wake up after espacing the planet Earth, so the Furstance soldiers, which they are anthro canines, anthro felines, & anthro hyenas, foreign soldiers who are anthro canines, anthro felines, anthro hyenas, anthro lemurs, Petidrans/Therians, and maybe Altertherians, and other furry beings like anthro canines & anthro felines, including anthro hyenas, many of Petidrans/Therians, and many of Altertherians do know much about furries like the word “fursuit” and “fursona”, which they know what it is, Delta Therian Complex is the final sector of the HIVAC Port Combine, where it has a interplanetary teleportation device & interplanetary teleportation ring device that accommodates with big and small land vehicles that connects with multiple habitable planets, which Huskarra and Velirum has a interplanetary teleportation device & interplanetary teleportation ring device that accommodates with big and small land vehicles too as well since it has been formed and invented in the mid 2050s BZE (Before Zodiac Era as of BC or BCE) before the HIVAC Port Combine the very famous massive underground military research facility was completely built in the late 1940s, but obviously, if what happens if the interdimensional teleportation device & interdimensional teleportation ring device that accommodates with big and small land vehicles is successfully formed and invented, so it would be occurred in late-1995, just like way back then where interdimensional teleporter was formed in 1150s, so it will have with every furry species in the huge furry planet and other furry planets, which some of furry planets are similar size as Land of Light from Ultraman where it has over decillion furry beings more like a hyper-homeworld planet, some of furry planets that are bigger than most of planets in the solar system, some of furry planets are super-Earth planets, some of furry planets are super-homeworld planets, some of furry planets population have over billions, trillions, quadrillions, quintillions, sextillions, septillions, octillions, nonillions, or decillions of

furry beings, which it depends on, and some of furry planets have mostly of anthropomorphic canines, which it's known as canine world or mostly of anthropomorphic canines and anthropomorphic felines, but sometimes like a kemono type, anthro duck worlds, which everyone is an anthro duck, cloudy lands, which it's part of Super Mario Galaxy-type furry universe, fantasy Asian towns, including mixture with mostly of fantasy Japanese-style towns and some of fantasy Chinese-style towns, and other kinds of furry universes, whichever it depends on in these different dimensions, however, where it has everything in it, which everyone don't feel any fear, pain, and loneliness, but either it's contemporary era, dreamlike era, futuristic era kinda like living in science fiction universe, modern era, or it's just kitsune girls & wolf girls or big cat girls, which they're big goddess animals, but they also speak Japanese because it's all about in these kinds of different dimensions that are extremely peaceful living and happily ever after, but little bit of conflict, however, either is gentleorviolent, whichever it depends on, dams with hydroelectric and power, and other like bedrooms sometimes look like a hotel rooms or a retirement home rooms, PC building rooms, cafeterias, storage area warehouses, administration, huge flat funicular elevators, but reference from Akira, autonomous announcement system, mass spectrometer, and some of more, but similar interiors to the Black Mesa Research Facility, which it's not an exact copy before started in use by the Furstance since it's no longer HIVAC Port Combine, it's renamed into Furstance Port Combine since it would owned by the Furstance affiliated by the Armed forces of the United Federal States and FSO or Furstance Syndicate Organization until in the mid-2010s, it has everything on Furoria where everything isn't the same that way, everything's different, every brands are different, it has a wildlife in it, but usually different, it's extremely peaceful planet since there's not a lot of messed up going on, which is not similar way as Earth where it has so many tragedies, some of similar languages are common like Arabic, Chinese/Mandarin, English, Finnish, French, German, Hindi, Italian, Korean, Japanese, Polish, Portuguese, Russian, Spanish, and Swedish, but similar language names are completely different and usually similar languages pronunciations are very different, such as the English language, which some of English accents are very different, but usually anthropomorphic animal languages are official in Zulekore, some official in Xianyora, some official in Nordicavire, and official in Clawsha, but there are at least 35 spoken languages exist. There are over 100 billion people on Furoria, whichever in the 21st century, where the population on Furoria grew so faster than Earth's population, which the population of Furoria would reach over 50 billion in the year 1998. Every generation is different, which Anthro canine population and anthro feline population has been rising since in the mid 1950s because anthropomorphic canine and anthropomorphic feline population did started growing at slow speed first in mid 1950s to early 1970s to normal speed in early 1970s to mid 1990s and then fast for rise up in mid 1990s to present around the Furworld, including anthro hyenas too, but Furoria's groundwater, lakes, rivers, and atmospheric water combined and has a hot solid inner core, liquid outer core, solid mantle, and the super thick crust, which the continental crust is 300-700 kilometers or 186-434 miles thick and the oceanic crust is 50-100 kilometers or 31-62 miles thick and the climate change would never happened and the super-Earth planet Furoria has different types landforms, plains, valleys, hills, plateaus, mountains, deltas, and other kinds of landforms on Furoria without any volcanic landforms and it's all Earth-like, but in Furoria not everyone have a long hair on their heads, not everyone have a short hair on their heads, not everyone have a hair on their heads, not everyone has a long fur, not everyone has a short fur, and not everybody do feel pain, but only death in pain and any fears too as well except many of Peditrans/Therians and Altertherians don't feel any pain because their bodies don't have suffer due to their unconventional genetics, but sometimes they can get sick and they always can be tired or exhausted, but their fears they have just only either afraid heights, death, being alone, or tall spaces, but pretty rare, which many of Peditrans/Therians and Altertherians don't have any fears because they're brave due to their lack of fear except all of Primatarins and Berdorons do feel pain, but only death in pain because their bodies don't suffer and generally sometimes Primatarins and Berdorons can die in pain, but sometimes they can get sick and they always can be tired or exhausted too as well and they do feel fear for some things, which sometimes they're either afraid heights, death, being alone, or tall spaces, but rare too as well, but obviously, nobody feels any fear

and pain because everyone is brave and generally there are only two Genders exist, Male & Female, but If the LGBTQ community exists in The Furuniverse, then the LGBTQ community will rise in the late 2000s, but most of the same beverages and foods, like vegetables, fruits, and other kinds of meals of which every brand is different, but many different beverages and foods exist, which are mostly of them.

5th Planet of the Furstar System is Velirum, the planet is 4.5 times bigger than Earth as a Human planet and it's a 5th planet in the Furstar System, which as a 3rd habitable planet in the Furstar System and the 2nd super-Earth planet that supports life in it and the population on Velirum has over 85 billion people, but the anthro species on Velirum is anthro lizards, anthro snakes, anthro komodo dragons, anthro sharks with two external ears often have wolf-like, dog-like, or cat-like, which anthro sharks have canine-like heads that are 1:6.8 to 1:7.8 of total body height and they often have hair (because it's smaller than realistic sharks, where it's closer to furry/canine proportions), anthro seals, anthro bats, anthro kangaroos, anthro hybrids like wolf/deer hybrid and other furry hybrid species, anthro hyenas, anthro coyotes, anthro dogs, which that are very similar to Labradors, German Shepherds, Border Collies, Australian Shepherds, Dobermans, Huskies, Belgian Malinois, and other kinds of dog breeds (as species, but not an exact copy), where they are anthropomorphic dogs, but every anthro dogs have different dog breeds (as species), but sometimes mixed-breeds (as hybrids), anthro foxes, anthro jackals, anthro wild dogs, anthro kitsunes, anthro wolves, anthro dragons, anthro dingoes, anthro dolphins, which their heads are shortened, stylized muzzle (often semi-canine) that are 1:6.9 to 1:8 of total body height and they often have hair as well, anthro sea lions, anthro orcas with two external ears often have wolf-like, dog-like, or cat-like, which anthro orcas have canine-like heads that are 1:6.5 to 1:8 of total body height and they often have hair as well (because it's smaller than realistic orcas, where it's closer to furry/canine proportions), anthro deers, anthro reindeers, anthro elks, anthro caribous, anthro lemurs, anthro alligators, anthro crocodiles, anthro cats, and anthro big cats, including with some of furries in Velirum who are mermaids, which furry species on Velirum are diversity; anthro sharks, anthro sea lions, anthro seals, anthro dolphins, anthro orcas are Marinians, anthro lizards, anthro snakes, anthro komodo dragon, anthro alligators, and anthro crocodiles are Reptilians, and anthro canines, anthro big cats, anthro big cats, anthro kangaroos, anthro deers, anthro bats, anthro elks, anthro reindeers, and anthro caribous are Petidrans/Therians, but anthro elks, anthro reindeers, and anthro reindeers are considered Altertherians, but the largest population on Velirum are Peditrans/Therians, Reptilians are the 2nd largest population, anthro dragons are the 3rd largest population, and Marinians are the 4th largest population and it includes with futuristic cities, futuristic vehicles, and futuristic technology where it's a highly advanced and powerful technology, but for that time Velirum has no tragedies just like Huskarra, no climate change, highly advanced, peaceful, prosperous society, no volcanoes, only very few real weapons, but only used by security guards, which mostly they would play with toy guns or water guns, no military bases, oceans, rivers, lakes, and other things on Velirum, but usually every furry beings on Velirum don't feel any pain and fear, which they are highly advanced peaceful furry beings and sometimes children furry beings are cringe or naughty, but the inside of the super-Earth/homeworld planet Velirum has a hot solid inner core, liquid outer core, solid mantle, and the thick crust and only two genders, male & female and the languages on Velirum is Auranth, Canith, English, Finnish, French, German, Japanese, Korean, Polish, Russian, Spanish, Swedish, Varnuk, Velirumite, and Zenthari, but similar language names are completely different and usually similar languages pronunciations are very different, such as the English language, which English accents are completely different.

In the Furuniverse reality, it has dozens upon dozens of habitable furry planets, but mostly unknown and at least 20,000 have been confirmed where it's dozens or few light years away, but there are infinite amounts of furry habitable planets, uninhabitable planets, and stars, which is an extremely hard to confirm all of it because it's too much information to confirm and it's fair and all of power tools uses stop brakes for automatic response by attempting cut a skin or a food, which they're much powerful to defend against serious injury, including garbage disposals too as well, but usually HIVAC security guards & HIVAC soldiers do wear with a urban camouflage uniform, black military boots, hats, but usually they

wear either with berets, patrol caps, boonie hats, helmets sometimes if needed, or no hat, whichever it depends, PCV or powered combat vests, PCBA or powered combat body armor, or HEV body armor or Hazardous EnVironment body armor with built-in voice announcement, which it used by the Furstance and usually sometimes HIVAC security guards & HIVAC soldiers do smoke with healthy cigars, healthy cigarettes, or pipes cigars with healthy, therapeutic, or non-addictive plant blends, some of bedrooms in HIVAC Port Combine do have a MR640 radio, which is similar as HECU/military radio from Black Mesa the fan-made remake version of the original Half-Life game and some of bedrooms in HIVAC Port Combine have non-stop air mattress beds for lying down for sleeping or sitting, which it depends on, but HIVAC Port Combine does have one story house-like & apartment-like rooms that are adjoined, but sometimes, including private bathrooms, but sometimes with just shower or shower & tub, which it depends on, it can have with model railroad layouts, which it can have HO scale or O scale, but maybe, including with power lines with wires, computer and pc parts storage, or a model collection, Building Briks as a LEGO-type or LEGO-compatible building set collection, or a Tech'onic as a K'nex-type or K'nex-compatible building set collection, bedrooms closets can have scale model kits like big truck model kits like semi-truck model kits, dump truck model kits, box truck model kits, armored truck model kits, race truck model kits, drag truck model kits, custom drag truck transporter truck model kits, custom race truck transporter truck model kits, and other kinds of big truck model kits, but there are some are Peterbilt-type, some are DAF-type, some are Kenworth-type, some are Freightliner-type, some are Western Star-type, some are International-type, some are Mack-type, some are MAN-type, some are Renault-type, some are Scania-type, some are Mercedes-Benz-type, some are Volvo-type, which it's not an obvious copycat thing, and mostly are generic-type, but there are many of generic-type big trucks uses International 4000 & 8000 series and 9400 style headlights, Volvo vmm or Bluebird vision-style headlights, and Nissan Skyline R32-style headlights, semi-trailer model kits, road train trailer model kits, pickup truck models kits, car model kits, which there are either as 1:24 scaleor1:25 scale, and other kinds if model kits like military vehicle model kits, fictional mecha model kits, and aircraft model kits, which it's inside these boxes; some of them are completed, but sometimes with dust textures, sometimes with diorama and usually many of them is inside the display case and it's located in bedrooms, living rooms, kitchens, and bathrooms, which that are customized, including with unused model trains that are G scale, O scale, or HO scale, however, Building Briks & Tech'onic building sets, pc parts, monitors, clothes, CRT TVs, VCR players or video disc players, diecast model vehicles, which there are 1:24 scale big truck diecast models like diecast model armored trucks, diecast model car carrier trucks, diecast model dump trucks, diecast model fire trucks, diecast model garbage trucks, diecast model semi-trucks, and other diecast model big trucks that are 1:24 scale, 1:24 scale diecast model semi-trailers, 1:24 scale diecast model road train trailers, 1:24 scale diecast model pickup trucks, 1:24 scale diecast model RVs, which are class A and class C, 1:24 scale diecast model RV buses, 1:24 scale diecast model buses, 1:24 scale diecast model school buses, 1:24 scale car diecast models, other kinds of 1:24 scale diecast models, and other kinds of scale diecast models, engine models like diesel engine models, jet engine models, and petrol engine models, airbrush paint sets, spray paint sets, airbrush boothes, paint sets, weathering paint sets, weathering sets, and model kit tool sets with model glues & super glues, where many of these bedroom closets have so many items, where security gaurds and sometimes scientists put so many things in bedroom closets for their personal collection, sometimes rooms have triple-head ceiling fans, sometimes rooms have double-head ceiling fans, and sometimes rooms have normal ceiling fans, but either with 3 blades, 4, blades, or 5 blades, all apartment-like and one story house-like rooms have floor HVAC registers, ceiling HVAC registers, but sometimes big AC vents grilles, which either as squareorrectangle ones, wall HVAC registers, but sometimes big AC vents grilles, which either as squareorrectangle ones, drop ceilings, but in square shape (only one story house-like rooms), LED recessed ceiling lights, dimmable led light switches, sometimes dual dimmer switch between with a fan control & light switch, sometimes dimmable switches or normal switches just for ceiling fans with a light only, motion sensor light switches, but only use for bathrooms, laundry rooms, and closets, small kitchen areas with floor tiles, exhaust fans only in

bathrooms, house-style carpets, ethernet wall outlets, coaxial wall plates, either quad electrical outletsordouble electrical outlets, either oneortwo private bathrooms with floor tiles, either with auto-flushormanual-flush toilets with tanks and floor drain, but sometimes with auto-flush or manual-flush urinals, sometimes with dining rooms with tiles, living rooms, foyers, sometimes owner's suites, half wall panels, and house-style doors, which it depends on; apartments & housings are located in Area 7-G Topside Dormitories the area is located within Sector 3-C Coolant Reserve & Storage, along the Sector 3-C line of HIVAC Port Combine Transit System, adjoined apartment-like rooms are located in Level 2-B & 4-D Dormitories the area is located along the Sector 2-B line of HIVAC Port Combine Transit System, and adjoined one story house-like rooms are located in Level 3-C Dormitories the area is located within Sector 5-E Administration, along the Sector 5-E line of HIVAC Port Combine Transit System, but it does look like a hotel area, but usually it does have hallways and lobby that are have some pitched black due to its power saving or lighting problems and empty too because nobody on these floors, but not abandoned, but kind of creepy and generally there are some countries on Furoria have railroad tracks with many of wolf cub pests, puppy pests, kitten pests, fox cub pests, & baby bunny pests everywhere in Zulekore including jackal cub pests except some parts in North Zulekore, South Xianyora such as Ducklandia and Liberen because it's has less, South Auratheria, Somborerio, Central Auratheria, and some parts in Auratherian Islands, there are some countries on Furoria have railway tracks with only very few of fox cub pests, coyote cub pests, & baby bunny pests in North Auratheria, some parts in Southeast Xianyora, some parts in Halimah, Pawveria, & Clawsha, sometimes bathrooms have wolf cub pests, puppy pests, fox cub pests, & baby bunny pests, sometimes kitchens have puppy pests & kitten pests, sometimes hallways have puppy pests & kitten pests, sometimes warehouse rooms, big garages, & big storages have wolf cub pests, jackal cub pests, fox cub pests, coyote cub pests, & baby bunny pests, but usually except some of underground research facilities and underground military research facility bases owned by HIVAC do have one where they appeared, which they are diverse research facilities just like HIVAC Port Combine, but not all of them, sometimes farm field soils have baby bunny pests, coyote cub pests, fox cub pests, jackal cub pests, & wolf pests, sometimes indoor gardens & outdoor gardens have baby bunny pests, coyote cub pests, fox cub pests, jackal cub pests, & wolf cub pests, and underground spaces like sewer entrances, storm drains, subway maintenance, and abandoned basements, markets, old buildings, and vehicle depots usually have baby bunny pests, coyote cub pests, fox cub pests, jackal cub pests, kitten pests, puppy pests, and wolf cub pests, but including microkits and micropups as pests too; usually, baby bunny pests, coyote cub pests, fox cub pests, jackal cub pests, kitten pests, puppy pests, & wolf cub pests do have lack of fear & pain because they have alien biology due to their unconventional genetics, which they're not like normal tiny animals, they're not considered as pets and wildlife, and they're not dangerous either whatsoever, but usually, they're genetically similar to real-world baby bunnies, real-world coyote cubs, real-world fox cubs, real-world domesticated kittens, real-world jackal cubs, real-world domesticated puppies, and real-world wolf cubs, however, it is called pestites, kitites, or pupites, such as coyote cub pests and jackal cub pests, which they called it Pest X or Pup X, their bodies are brave, they love to sleep, eat anything they want, acting like Boohbahs sometimes, sometimes barking, sometimes angry, sometimes screaming, whining, or crying, and sometimes hiccups a lot, but usually they always harvest or capture, sometimes putting on clear trash bags, load into a dump truck, grain truck, or a train with using with a kitite/pestite/pupite/Pest X/Pup X harvesters, which they use that kind of harvester vehicle that loads and unload into grain trucks, conveyor belts that loads and unload into dump trucks and trains, kitite/pestite/pupite farm silos that loads and unload into grain trucks and trains, wheel loaders, excavators, or backhoes, which they use these construction vehicles that loads and unload into dump trucks, and then unload into a industry, but sometimes after clean trash bags burst or tear open for its electricity, food, and material production due to pest control including biomass incenerator for electricity and material production because of biohazard waste and macerator for food production because of bio-processing, but usually not just Furoria and the Furuniverse only, but around these other utopian non-futuristic era planets outside of the Furstar System in the Furuniverse like Monkeyrum that

uses left-hand traffic, Primatopia that uses left-hand traffic, and other modern era planets, where it has tropical lands or subtropical lands, uses left-hand traffic, right-hand traffic, or mixed, only just Primatarins live or other anthropomorphic animal species, only just English-speaking like Monkeyrum, Primatopia, and some of other modern era planets, other native languages on other modern era planets, and other dimensions too as well, which that are non-futuristic era, whichever it depends on if it gets too overpopulated, but rodents, scrap hounds, spiders, flies, moths, gnats, ladybugs, and other kinds of bugs as pests do exist, but completely different than Earth's; underground research facilities do have bug pests sometimes, which it depends on wherever usually they discovered these planets in space, but basically, some parts in Western United Federal States do operate with electric freight trains & road trains (known as long load haulers) and Western Central Plains do operate with road trains (known as long load haulers) too as well, but usually road trains do operate in Darrakoon, some parts in Auratherias, some parts in southern Zulekore, some parts in Nordicavire, some parts in Ducklandia, and some parts in Clawsha. However, every anthro beings have their average heads that are bigger or smaller than the heads of normal real-world animals, which they're not human shaped whatsoever because they are animal-based in structure, just scaled and evolved for upright living. All in all, anthropomorphic animals are taller than average humans and short humans, such as Primatarins that are semi-tall (such as anthro lemurs, which are tall) due of their genetics and they have ideal weight too as well, but sometimes female anthropomorphic animals can be skinny, however, it's because they have extremely fast metabolism, which it does take a very long time to become overweight, but normally, expect some of Berdorons, Primatarins (not, including with anthro lemurs), some of Altertherians, and anthro pigs & anthro hogs are overweight, but it's natural because they eat a lot of junk food, which it takes a very long time to gain weight, apparently, Primatarins are semi-tall anthropomorphic animals, such as anthro lemurs, which they are tall and generally anthro canines, anthro felines, anthro hyenas, Peditrans/Therians, Altertherians, and Berdorons are the tall anthro species, but usually some many of Primatarins are tall too as well and in truth, every anthro beings have plantigrade legs and feet, which their feet shaped like human feet, human-like bodies, balanced torsos, and balanced bodies in the Furuniverse. However, everything is not an exact copycat and parallel.

1st of August, 2025

DAMN! The time is going so fucking quick for nowadays, which how much long it takes, always, I know the time going too quickly for days blur into weeks, weeks into months, and months into years because we are all getting old nowadays and everything is getting old nowadays because most things aren't new at all, so yeah, but it is today is the first day of August because yesterday it was a last of July, which the summer break is almost over, but truly.
MAN, I FINALLY FINISHED WRITING MY VERY LONG PAGE-DOCUMENT NAMED "The Three Habitable Planets In The Furstar System In The Furuniverse The Alternative Real-Life Form From Different Reality Encyclopedia", WHICH IT DID TOOK ME MONTHS AND MONTHS AT LEAST I'VE FINISHED WRITING IT! DAMN IT WAS SO HARD FOR ME TO WRITE!!! So, I just renamed it, which that kind of very page-document name was called "The Three Habitable Planets In The Furstar System In The Furuniverse The Alternative Real-Life Form From Different Reality Documentary" and then I renamed into "The Three Habitable Planets In The Furstar System In The Furuniverse The Alternative Real-Life Form From Different Reality Encyclopedia" including extra encyclopedia with random topics. However, it seems fair enough for that, but if what happens that if I go to the different dimension after I transformed into wolf with small antlers, which similar as Penny Fitzgerald as a wolf where she transformed with my nice fur, so I would spend like a lot time in another dimension before I come back to the Furuniverse after I transform back into an anthro husky or unfortunately, never come back, which I'll be stuck in the another dimension forever and pretty much, but it feels like I had to be alone for a while at least if I make new friends in another dimension, so I would be reunited with them, but it's part of my strong personal afterlife belief, where I would be reincarnated as a tall 6'1" anthro husky man with 3 tails, which I'm a mythic superstar, but I will include a mythic superstar girlfriend to have relationship before I would be reborn as an anthro husky girl, but starting a new life as a newborn anthro husky girl with a new rich family that are taller than average and short, so yeah, that's all I had to say from now on.

4th of August, 2025 (Updated in 09/16/25)

Three habitable planets in the Furstar System, which I resized in kilometers:

Huskarra:

- **62,436 KM in Diameter**
- **31,218 KM in Radius**

Furoria:

- **63,710 KM in Diameter**
- **31,855 KM in Radius**

Velirum:

- **57,339 KM in Diameter**
- **28,670 KM in Radius**

NEXT IS IN MILES, SO LET'S GO!!!

4th of August, 2025 (Updated in 09/16/25)

Three habitable planets in the Furstar System, which I resized in miles:

Huskarra:

- **38,798 Miles in Diameter**
- **19,399 Miles in Radius**

Furoria:

- **39,593 Miles in Diameter**
- **19,795 Miles in Radius**

Velirum:

- **35,631 Miles in Diameter**
- **17,816 Miles in Radius**

AND YEP! THAT'S PRETTY MUCH IT I HAD FOR NOW ON!

10th of August, 2025

Heights of anthro species in the Furuniverse including Furoria:

Anthro Canines:
- **Around 6’1”-6’6” as a Male**
- **Around 5’9”-6’2” as a Female**

Anthro Felines:
- **Around 5’11”-6’6” as a Male**
- **Around 5’8”-6’2” as a Female**

Anthro Hyenas:
- **Around 6’0.5”-6’5” as a Male**
- **Around 5’9”-6’1.5” as a Female**

Peditrans/Therians:
- **Around 5’11”-6’8” as a Male**
- **Around 5’8”-6’3” as a Female**

Altertherians:
- **Around 6’0”-6’10” as a Male**
- **Around 5’8”-6’5” as a Female**

Berdorons:
- **Around 5’11”-6’4.5” as a Male**
- **Around 5’8”-6’0” as a Female**

Primatarins (Excluding Anthro Lemurs):
- **Around 5’9”-6’4” as a Male (Sometimes They're Tall)**
- **Around 5’6.5”-5’11” as a Female (Sometimes They're Tall)**

Including Anthro Lemurs:
- **Around 5’11”-6’4” as a Male**
- **Around 5’9”-6’0” as a Female**

Usually, there are many Berdorons & Primatarins are born into machines, including government-assigned jobs, depending on what job they would get. However, machine-born Altertherians & Peditrans/Therians just live naturally, but they usually would get superpowers for becoming an artist for creativity, animator, or game developer, which they're being highly skilled or write something on their personal journals.
Machine-born Berdorons & Primatarins (including machine-born Altertherians & Peditrans/Therians) do go to these guild-like academies for learning and growing in the future, however, it’s pretty strict and rigid, but if they failed test and get bad evaluations, so they'll probably be sentenced to massive underground hard labor, which that place is like a prison building or something if they completed test and get good evaluations, purposely, just like guilds in Krypton in DC comics universe, but they’re not usually horrible criminals whatsoever.

10th of August, 2025

I know people don't like living with their parents who are being miscommunicated, misheard, misunderstood, negative, problematic, rude, or toxic (including their siblings), I knew it, I know, I know, I'm bear with you, I know dislike living with my parents who are being miscommunicated, misheard, misunderstood, negative, problematic, rude, or toxic (including my siblings too I would say), however, it's pretty hard to live with parents who are being miscommunicated, misheard, misunderstood, negative, problematic, rude, or toxic (including siblings too or no siblings whatsoever), so yeah, I wanted to say this that I know life is not as easy as hell, life is damn hard because it's hard to live on the planet Earth, which the our planet is not a very big planet, it's a small planet, but in fact, Earth has nearly 200 countries and over 7,100 languages spoken, but obviously, the most powerful country on Earth is THE UNITED STATES OF AMERICA, which the United States did become a global superpower about long time ago, so yeah, it was way back then, however, America has a strongest military on Earth, where the United States Armed Forces spend more money than China, Russia, and most of all countries on Earth, but it's probably true.
I might be wondering that the HIVAC Port Combine the very famous massive underground military-scientific research facility base has dormitories, where it has massive hobby collection like model kits, diecast toys, track sets, and more, where scientists and security guards kept then as a personal collection, which it's according on my very long page-document called "The Three Habitable Planets In The Furstar System In The Furuniverse The Alternative Real-Life Form From A Different Reality Encyclopedia" with an extra encyclopedia, usually, just like my grandpa, which he used to have collection where he used to live in an apartment in Wichita, Kansas for over a decade I would say, but the apartment name is I would say Westborough Arms apartment and yeah, which he used to live very close to the tiny playground where Westborough Arms apartment used to have one before he moved to Oklahoma, which my grandpa used to live in our house and then used to live in Wellington Parke LLC the retirement living community before his death and I wanna say this that please don't disrespect me, but usually, my grandma too, where she used to live in Connecticut for decades back then before I did become somewhat well-known, but it's in my dad's side, which he is just only a child and as I said, it's part of my family's privacy because I never thought I would share too much of it publicly, so yeah, always please respect me and my family's privacy at this time. I won't be saying anything serious for a while publicly, as it might hurt a lot of people's feelings. In fact, there are many people have aunts and uncles on their mom's side and dad's side, many people have aunts and uncles on their only mom's side like me, and many people have aunts and uncles on their only dad's side and just I noticed that everyone's different, but speaking of family's privacy, including my family's privacy.
So, I will go like "HOLY SHIT THAT'S A LOT!!!", which I would love to see it in these apartment-like, retirement-like, and one story-house-like bedroom closets and other rooms with collection including many model kits are completed in dormitories in HIVAC Port Combine and yeah, but it's part of my belief, where I developed so far for my creativity and yeah, that's pretty much it what I had to say for now on.

14th of August, 2025

Return to this reality to be born as a human again? OH, HELL NO!!! No way I'll be born as a human again in this reality after the end of living in the Furuniverse, including furries, therians and furry-therian hybrids, which they identified both will someday be reincarnated as anthro animals will have no chance to come back to this reality to be born as a human again after the end of living in the Furuniverse. However, it doesn't matter if furries, therians and furry-therian hybrids as anthro animals identified themself as agnostic, atheist, or spiritual, but as I said; there's no chance that furries, therians and furry-therian hybrids will be come back as humans for my opinion, but wherever you furries, therians and furry-therian hybrids go to another dimension, wherever you furries, therians and furry-therian hybrids go to another planet, and wherever you furries, therians and furry-therian hybrids go to different country or neutral territories, which they're unclaimed, but instead, wherever you live, so yeah, but speaking of people who are inviting to join the Furuniverse for an afterlife, in the Furuniverse, fire trucks, buses, school buses, medium-duty trucks, and rarely sometimes heavy-duty trucks including semi-trailer trucks, which usually the older ones, military ones, and day cab ones and commonly, Aussie prime mover-type prime haulers use 2-hole Budd steel wheels, but more commonly, which including heavy-duty trucks use 5-hole steel Budd wheels, 10-hole steel Budd wheels, 5-hole aluminum Budd wheels, or 10-hole aluminum Budd wheels, however, it generally depends on including Furoria the utopian super-Earth planet, but chances are fire trucks only the older ones, buses only the older ones, medium-duty trucks only the older ones, heavy-duty trucks only the older ones, and Aussie prime mover-type prime haulers use demountable wheels, but usually use with 5 spoke or 6 spoke dayton hubs wherever it depends on just like our planet Earth including the utopian super-Earth planet Furoria. There are every cities on Furoria have mostly of above ground buildings than underground because there are cities have only some of underground buildings, which either is like very huge or not huge, but not including like underground skyscrapers, however, there are research facilities are huge complex because they have diversity just like HIVAC Port Combine, which it's like a city, but some are above-ground including underground places and mostly are underground and it's not just a research facility, but also has a military presence just like Black Mesa Research Facility from Half-Life and I can prove that is in fact, real, so yeah, everything's completely different it's because nothing is the same.

20th of August, 2025

Man... this is just pathetic. Policies are cooked nowadays, however, things have been changed nowadays about policies due to the local government and national government restrictions and yeah, some of them are pretty strict, some are not, but I know there's a lot fucked up shit on Earth and the Internet... yep... nowadays every year, so yeah, pretty much.
I've been developing the Furuniverse as of my personal belief so far, which is a very hard work including the Furworld map of Furoria, but there are all 22 countries in Furoria and all of the countries in Auratherias; Canidland a neutralized unitary country, the United Federal States of Auratheria a federal country, Somborerio a unitary empire (used to be a federal empire), Cubén a unitary country, Monkania a neutral unitary country, Perterrio a federal empire, & Suria a neutral unitary country and countries in Zule-Nordianyora, Darrakoon, & Clawsha; Furolish Kingdom a unitary country, Nordicaviran Union a federal country, Kingdom of Karellaberg a neutral unitary country, Slavania a neutral unitary country (used to be a federal country), Ruskarra a federal country, United Halimah Arabia a neutral unitary country (used to be a federal country), Zulekorese Union a neutral federal empire, South Zulekore LeSimba a unitary country, Chingduo a unitary country, Furon a unitary empire, Pankhdesh Raj a federal empire, Ducklandia (United Ducklandian States) a federal country, Liberen a neutral unitary country, Valkoraya a neutralized unitary country, & Darrakoon a unitary country, which there are all 7 federal states and 15 unitary countries because there are all 22 countries on Furoria, so yeah, the utopian planet is 4.1 times bigger than our planet Earth because our planet is not usually a utopia at all and speaking of Earth the our planet we live in, these are every countries on Furoria that are republic and monarchy including states or provinces:

1. **United Federal States - Federal Republic - 100 States**
2. **Ducklandia, officially the United Ducklandian States - Federal Republic - 55 States**
3. **Ruskarra or the United Ruskarran Federation - Federal Republic - 50 Federal Subjects**
4. **Perterrio, officially the Empire of Perterrio - Federal Monarchy - 47 Federal States**
5. **Furon, officially the Empire of Furon - Unitary Monarchy - 40 Prefectures**
6. **Chingduo - Unitary Republic - 37 Prefectures**
7. **Somborerio, officially the United Somborerian Empire - Unitary Monarchy - 35 States**
8. **Pankhdesh Raj or the Dominion of Pankhdesh Raj, officially the Union of Pankhdesh Raj - Federal Monarchy - 30 States**
9. **Zulekorese Union - Neutralized Federal Monarchy - 25 Subdivisions**
10. **Slavania, officially the United Territory of Slavania - Neutralized Unitary Country - 22 Administrative Divisions**
11. **Monkania - Neutralized Unitary Country - 20 Divisions**
12. **Valkoraya, officially the Great Kingdom of Valkoraya - Neutralized Unitary Monarchy - 15 Administrative Provinces**
13. **Suria - Neutralized Unitary Country - 13 Regions**
14. **United Halimah Arabia - Neutralized Unitary Monarchy - 11 Subdivisions**
15. **Liberen, officially the United Liberenese States - Neutralized Unitary Country - 10 States**
16. **Cubén, officially the Socialist Republic of Cubén - Unitary Republic - 9 Administrative Divisions**
17. **Canidland - Neutralized Unitary Monarchy - 8 Administrative Provinces**
18. **South Zulekore LeSimba - Unitary Republic - 7 Divisions**
19. **Nordicaviran Union - Federal Republic - 5 Countries as Federal States**
20. **Darrakoon - Unitary Monarchy - 4 States**
21. **Furolish Kingdom of Great Vulpeland and Isle of Canineland, commonly known as the Furolish Kingdom - Unitary Monarchy - 2 Kingdoms**
22. **Kingdom of Karellaberg - Neutralized Unitary Monarchy - 2 Kingdoms**

Basically, there are neutralized countries as republic countries have no government, but only neutralized monarchy countries have government and usually, overhead power lines do exist on Furoria, but it's not quite the same as the messy, ugly ass ones where we see overhead power lines on Earth, however, overhead power lines generally exist on rural areas, neutral zones, and nearly urban areas and apparently, biomes definitely do exist on Furoria, just like the our planet Earth.

24th of August, 2025

It’s 2025 for me right now and this year is crazy year for me because I’ve been developing my belief system so far, which is pretty awesome and yeah, I feel like I’m still developing my belief much more further as I can do for by myself, but I am pleased to my obsession with the Furuniverse much more further because souls are the mastermind the wolfpacks in the forest, influence the wolfpacks to tell the truth, however, life is generally not the end, everything’s completely different, and nothing is the same so that is why I am pleased. Microwolves, micropuppies, microjackals, microfoxes, and microcoyotes, which are micropups that are typically alive food or dish do exist in the Furuniverse and microbunnies and microkittens that are microkits are alive foods do exist in the Furuniverse too because they don’t suffer, which they don’t feel fear and pain, they’re flavorful, they have squeaky voices ‘cause they make noises, they're vegetarian food or dish, and they're tiny, but typically, very similar to real-world domesticated puppies, real-world baby wolves, real-world baby jackals, real-world baby foxes, real-world baby coyotes, real-world domesticated cats, and real-world baby bunnies, yada, yada, yada, usually, similar in size to large insects or fruits, but not just the Furuniverse, but in these differents have microkits and micropups exist and speaking about foods exist in the Furuniverse and other dimensions, Huskarra’s interior is cold because Huskarra has cold mantle and core and Furoria and Velirum interior is hot, but not as hot as the Earth's interior because Furoria and Velirum has a warm mantle and core, which is both warmer than Earth's core, but all 3 habitable planets in the Furstar System is more habitable than our planet Earth, but it has gravity in it and all 3 habitable planets in the Furstar System is utopia and way bigger than the our planet in the Solar System, but truly. I’m pretty curious that I will live in Furoria for a while before rebirth as anthro husky girl for living a new rich famous family in the Furuniverse a utopian universe and it is way older than the observable universe more like our universe, so yeah, if go to the another dimension after I ended up in the interdimensional teleporter like anthro duck worlds in another dimensions or other kinds of dimensions excluding our reality, so I might live in the another reality for a while, but in the utopian anthro duck world in the different dimension, they usually just speak just English and German only, but little mass amounts of population are German-speaking, which pronunciations of German language is completely different, only one country, everything does exist, but not the same, has American-style structures, just like Auratheria, Canidland, Darrakoon, Ducklandia, and Liberen do have one, but completely different, and uses left-hand traffic and some of right-hand traffic or another utopian anthro duck worlds in these other dimensions do have everything exist, but not the same, has American-style structures, just like Auratheria, Canidland, Darrakoon, Ducklandia, and Liberen literally do have one, but very different, not just English-speaking only, but little mass amounts of population are German-speaking, which pronunciations of German language is completely different and other languages they speak, uses left-hand traffic, right-hand traffic, or both, whichever it depends on and yeah, if I have chance to go there, so I would live for a while and then comeback to Furoria, so yeah, I would love to go to these places in the furworld, other planets, and other dimensions, but that’s my afterlife plan.

24th of August, 2025

2 months ago, I did get all 4 of my wisdom teeth out of my mouth when I was taking in a nap in the dentist and I did use a ice pack head wrap, take a pain medicine, and eat soft foods during days to days to heal after wisdom teeth removal surgery and then into weeks to weeks to heal it and did get bit better and then months to heal and did get better, which is nice and I know it was hurtful and such a pain in the ass to do because it was a big day for me and almost 2 months later after first day of school, me and both of my parents went to TFCU for making my new bank account, but it's located near middle school where I go to and it was a pretty long waiting, but many minutes later, I also did get my bank account, no joke, and by the way, I did get my debit card, but I did chose the debit card color yellow in my opinion and unfortunately, my mom locked it away my debit card, my social security card, and my ID 'cause I just can't use it right now, so anyways.

26th of August, 2025

In the Furuniverse, everyone oppose with human religion because there's no human religion exist for sure, but there are wolf titans, supra titans (sometimes with 4-6 ears and 2–9 tails), navara titans (sometimes with 4-6 ears and 2–6 tails), hilux titans (sometimes with 4 ears and 2–4 tails), fox titans, kitsune titans, and coyote titans (including hybrid canine titans too, but sometimes with 4-6 ears and 2–9 tails), because they're way too many times bigger than the observable universe, way bigger than the One Paw of God, which is a god-like titan supercluster, and Paw of Titans that are god-like titan superclusters, but they're one of the nicest and most gentle massive god-like or goddess-like cosmic creatures to ever exist in the Furuniverse, which is an act of kindness how powerful they are, but they're mysterious and definitely, they are the most popular figures to ever exist in the Furuniverse and chances are mostly are females than male because female canine titans embody pure cosmic feminine power, so vast and enduring that it feels like they've conquered the entire Furuniverse the massive infinite universe, but speaking of canine titans exist in the Furuniverse, all countries on Furoria uses furmetric/metric units, such as, Auratheria (U.F.S.), Canidland, which some parts in southern and western Canidland uses furimperial/imperial units, Ducklandia, Furolish Kingdom, Liberen, and South Zulekore LeSimba that uses both of furimperial/imperial and furmetric/metric units, but on the our planet Earth, only very few of countries uses imperial units and mostly of countries uses metric units, such as the United Kingdom it's because the UK uses both of imperial and metric units and usually Canada too, but only some parts in southern and western Canada uses imperial units.

28th of August, 2025

So, I wanna to say this that countries that are literally under Furolish rule as their head of state, which are within the Furolish realm system:

1. **Canidland**
2. **Darrakoon**
3. **Pankhdesh Raj or the Dominion of Pankhdesh Raj, officially the Union of Pankhdesh Raj**
4. **Valkoraya, officially the Great Kingdom of Valkoraya**

So, yeah, that's all 4 countries still under Furolish rule in the furworld, but one of them is South Zulekore LeSimba that used to be under Furolish rule for a long time ago.

Countries that are usually under Ducklandian rule, which are within the Auratherian & Ducklandian (A&D) realm system:

1. **Liberen, officially the United Liberenese States**
2. **Monkania**

That's double of countries in the furworld are under Ducklandian rule because they were both gained formation from Ducklandian Imperialism Colonial Society, but one of them is Liberen that was gained formation from Ducklandian Imperialism Colonial Society and Ruskarran Empire, where both of countries colonized Liberen for a long time ago and speaking of countries gained formation from other countries in furworld history, when it comes to its construction, most buildings on Earth are above ground and some buildings on Earth underground, which is rare including utilities because it's pretty cheap to build and yes, it's true, but eventually, I believe that Furoria has mostly of many buildings are above ground and many buildings are underground because they're very strong, especially located outside major cities on Furoria including utilities, which utilities are in not handled in the same way as Earth's utilities, mostly utilities in medium & big major cities on Furoria are generally underground because it's more advanced than Earth's systems.

30th of August, 2025

In Fiction:
As the late Délphine Revord once said where she wrote in her personal journals, “My full name is Délphine Lou-Faustine Revord, and I am a French Canadian girl from Québec City, Québec, Canada. On July 5th, 2006, in a hospital in Québec City, I was born when I entered this world, where I’ve been living on Earth for 18 years. It’s 2024 for me right now and as for that point I am always obsessed with the Furuniverse, where I decided I wanted to escape from my personal privacy so I would become a machine-born natural mythic anthropomorphic animal celebrity in the Furuniverse, which I’ll be living on Furoria where all times who will be influenced with me Pyotor Kulikov is one of my newest obsessions. I wanted to die and truly live a better place to reunite with them so I can join it for real, which I will be born in July 18th, 1981 in the machine location in HIVAC Port Combine the massive underground military-scientific research facility, where Pyotor Kulikov created that kind of concept for a long time ago. My ideation is I will be reborn as an anthropomorphic black wolf girl trapped inside my entire human body, which I’m going to be a tall 5’11” anthropomorphic black wolf girl with fully darkness fur, 3 tails, skinny body, and feet size 9 as women’s feet size, but kinda feels like I’m a secret person so I would have a new boyfriend and meet Pyotor Kulikov the tall 6’4” anthro wolf for real, where Kulikov is a first person to appear on Furoria in the Furuniverse in the year 1955. I wish I will be reborn as an anthropomorphic Belgian Malinois girl with a fully darkness mask, anthro German Shepherd girl with a fully darkness black mask, anthro black wolfdog girl with a fully darkness fur, or anthro coyote girl if I have the chance to choose all 4 anthro species to be reincarnated. However, I would be a highly skilled professional artist anthropomorphic animal person like just doing drawings or creating artworks, but I don't if I'm either going to be an animator, sculpturist, graphic designer, or other kinds of arts what I’m going to do, but as I’m a human, I am not a professional artist. I’m just some kid who does do YouTube for a while, but I know I’m somewhat a small YouTuber and I have like over 30k subs, which is pretty, but I’m still keep posting videos on YouTube, but sometimes including my Instagram account and TikTok account where I posted videos on Instagram and TikTok only sometimes, but not as huge as my YouTube channel because both of my accounts on Instagram and TikTok have small amounts of followers. At that time Pyotor Kulikov did developed the Furuniverse, the belief system so far and gained a huge following for so many years, but it was way back then before I was born, but I’ve been studying a lot about the Furuniverse on the Internet and I know life is so damn unfair nowadays because Earth doesn’t belong here for me, which it just doesn’t feel safe to live and I know there’s not very many people are rich, so yeah, that’s all for now.” At that time that’s her very long story, where Délphine Revord talked about her afterlife plan to escape from her natural family, human suffering, darkest days, and more of bad things, but it’s in the past where she was a 12th grade student in high school before she graduated and her native language is French, but her secondary language is English, which usually in French Canadian accent.

1st of September, 2025

Délphine Revord AKA CHiEN-lOUP the anthro black wolf girl is one of my newest relationships, which I will have my new real mythic girlfriend and I would meet with scientists, security guards, security soldiers, soldiers, and Pyotor Kulikov the tall real mythic anthro wolf who worked as an engineer, inventor, and worker, where they live in HIVAC Port Combine, the very famous massive underground military-scientific research facility, so I would reunite with my new mythic girlfriend, which I would live for a while in HIVAC Port Combine or something like their uncle's, father's, or grandfather's house, apartment, or a small auto mechanic workshop as a part of their home with a massive hobby collection like model kits, diecast models, model trains, and other kinds of hobbies like toys, computers, and other stuffs, where they live in either in central region or eastern region of the U.F.S., so I would love to visit to live for a while and eventually, I would be rely on big vehicles or medium vehicles like vans, camper vans, small motorhomes, medium motorhomes, big motorhomes, regular buses, buses that are converted into motorhomes, regular big trucks, or big trucks that are super c motorhomes sometimes with show haulers, but usually with a mobile radio and installed fully autonomous driving systems if needed because driving cars that can go fast is such a goddamn pain in the ass for me it is, so yeah, that is my opinion, which I will have nearly a single decade left to live in Furoria. However, sometimes I change or update my afterlife plan ideation, so the date is May 1st, 1993, where I will be reincarnated as a tall 6'1" anthropomorphic husky with 3 tails for waking up in the new dream, which is the bedroom, which is in the bedroom in located in 2-B Dormitories is located along the Sector 2-B line of the HIVAC Port Combine Transit System before my 17th Birthday in May 12th, 1993, so instead of that, I'll be featured on the mainstream media coverage for doing public interview including my dogs, Frankie the small mix dog, born in early-1994, which I would sleep with him all night long where he's always chill and no barking, Al the whiny dog, does barking, but sometimes always chill, Hina & Lily being chill, does barking sometimes, located another master bedroom, but all 3 are born in February 1996 including their parents, step-parents, and half-brother Scott, born in close to mid-1995, JoJo, born in June 1994 and his younger sister, born in early-1995, which sometimes I can sleep with them in another bedroom, and Shadow the husky, which he's just disappeared in the Furuniverse because Shadow is somewhere in the another dimension called MGR-101, so yeah, my dogs will live in separate bedrooms located in Level 3-C Dormitories located within Sector 5-E Administration, along the Sector 5-E HIVAC Port Combine Transit System that in my opinion, but in fact, homes have bathrooms that include floor drains everywhere in Furoria, and they're way common and advanced than our planet Earth 'cause it just won't cause flooding risk, but speaking of homes in Furoria, I genuinely wanted to go places in Furoria like bowling alley sometimes including with middle and high school boys sometimes they're muscular and bodybuilder, motorcycle & car gangs, which their culture is very different from Earth's, high school girls, and other kinds of random people going to bowling alley, but sometimes over couple thousand people in bowling alley where they go crazy and other public places including microkits & micropups that are the most popular alive flavorful eaten creatures ever exist, where it's featured on menu, so I decided that I would love to arm wrestle with someone for the showdown so why not, including my new mythic girlfriend too, in which she feels no suffering, pain and fear, just like everyone else in the Furuniverse reality. Short story time, so, in this reality in the deep past, back in my day I was a little person, I only have been to double countries, which is just only Japan and Germany, where it has U.S. military bases in it, however, me and my family went there for a long time ago 'cause my dad was served in the Air Force for 21 years (which I honestly think so and yeah), where he worked in the office and outside of office, but right now he's retired and I have been public places too many times, but mostly going to store and restaurant too many times, sometimes bowling alley, and sometimes other kinds of places I've been to, so yeah, 20 years, in a military hospital in Hawaii (which I definitely think so too as well), I was born when I entered this planet because I've been living on Earth for 20 years for now on, but in my opinion, I'm going to lovely public places in Furoria for having a big ass nice party and enjoying my rest of my life. In the Furuniverse and these different dimensions, anthro ducks have their body colored black, with an orange/yellow beak and leg, sometimes with an black beaks & legs, and no wings and anthro pelicans have their body colored white, with an orange/yellow beaks & legs, and no wings, but normally, they don't have opinions about Earth culture 'cause they literally don't know what that is at all, which they're not familiar with them.

1st of September, 2025

Things I do like and dislike about things:

Likes: bunnies, coyotes (because I would be reincarnated as a tall 6'2" anthro coyote trapped inside my entire human body), foxes, wolves, furries (because I'm always obsessed with them), therians (because I'm always obsessed with them too as well), Warrior Cats (I wish I would reunite with them for an afterlife, so I could join it for real), buses, cars, motorhomes, trucks, Littlest Pet Shop (I wish I would reunite with them for an afterlife, so I could join it for real), cats, dogs, puppies, food, model kits, utopia, driving big trucks (little bit, but in the Furuniverse and across other dimensions, yes), driving big vehicles (little bit, but in the Furuniverse and across other dimensions, yes), alternate reality (because I would rather live in the better reality than this reality, which is a Furuniverse the utopian reality for my personal belief), reincarnation (because I always believe in two-step reincarnation, where I would be reincarnated as a tall anthro coyote man and then reborn as anthro husky girl with black & white fur yada yada yada, with blue eyes for living with family), going to different dimensions, video games, hard working, modding, healthy food, sleeping, computers, art, fiction, eat, junk food (sometimes), being rich, memes, drawing, girls, guns (a bit occasionally), stories, animals, wild animals, documentaries, encyclopedia, concept art, writing, tv shows (sometimes), movies (sometimes), sports (sometimes), subscribers, followers, friends, social media, YouTube (if I try my best to make polished videos as possible for being a YouTuber), SimCity, Michael Jackson, The Beatles, animation, animation memes, short films, peace, pets (in the Furuniverse and across other dimensions, yes, though in reality, not really, but kind of), Minecraft, Survivor Dogs (I wish I would reunite with them for an afterlife, so I could join it for real), Erin Hunter Books (which I haven't read before, but I'm pretty interested into it), being a well-known person, being a normal weight person, hamsters, small animals, politics (sometimes, but I'm not get into politics, even though I don't give a crap about politics too much).
Dislikes: algebra, allergies, animal attacks, mucus, cold, nothingness, sinuses, school, math, the world, dystopia, being isolated, loneliness, violence, terrorism, gun violence, people have guns and knives at home for the home defence (which it literally disgusts me a lot in this planet because it doesn't feel safe to live), wars, beer, alcohol, being poor, toxicity, tragedies, dark things online (I know there's a lot fucked up shit on the Internet), driving cars (because it's just doesn't feel safe and shit for me to drive in reality, but in the Furuniverse and across other dimensions, maybe so), living with their parents who are being miscommunicated, misheard, misunderstood, negative, problematic, rude, or toxic (including their siblings too), living with my parents who are being miscommunicated, misheard, misunderstood, negative, problematic, rude, or toxic (including my siblings too), crimes, food, including bones inside, toxicity, dark web, incidents, accidents, guys with a facial hair, axillary hair, and body hair (which it genuinely disgusts me a lot in this planet), staying up all night long, people buying beer and then bringing at home (especially for carrying heavy ones), people own petrol-powered cars that can exceed over 100 MPH or over 160 KM/H, people are speeding up on the road, people sniff loudly (which it sounds like trumpet, vehicle exhaust, or a vacuum cleaner), bullying, cyberbulling, harassment, people get into fight, people think someone get into fight, people buying too much junk food and instant foods and then bringing at home, people yelling at someone, being overweight person, being obese person, eating too much junk food, anxiety, too much fears, mental health crisis, suffering, someone says about someone passing away, people doing on purpose things, people doing terrible things, people post content online that are seem boring, diabolical, disoriented, uncouth, unfunny, unoriginal, and unwell, highways with no speed limit, which is the Autobahn, kids hanging out in the restroom during school, living on a small island (but in the Furuniverse and across other dimensions, yes), staying up all night long, staying awake while sleeping, people's pets are overly problematic, garbage days, listening neighbor's dogs barking and other weird and unwanted noises during at home.

5th of September, 2025

Previously, I've talked about where I'm going places in Furoria like their friend's, uncle's, dad's, and other family member's, also, public places like casino, museum, bowling alleys sometimes with over 3,000 people, which it's so many people, and other kinds of public places with my new mythic girlfriend; Délphine Revord the anthro black wolf, so yeah, that's why I wanna go there after I die on Earth, where there's still a lot of messed up shit on the our planet; in fiction: In 2015, the Furuniverse, the belief system founded by Pyotor Kulikov reached over 1 billion followers, but usually they believe in one-step reincarnation, two-step reincarnation, and mostly reborn and live with new family or being born in machine in HIVAC Port Combine, which everything's not the same that way, also, their knowledges and memories would fade away, just like Délphine Revord because of Pyotor's worldview as a deep plan to escape from suffering, darkest days like horrific events, isolation, dark things online, and other kinds of bad stuffs to join the Furuniverse reality for real; there millions upon millions of Furuniverse believers died every single year, which after the Furuniverse become rise to power in 20th century and then became a greatest spiritual belief ever and still ongoing. In fact: In this reality, dimensions are not parallel or separated from multiple different universes, but rather directions can travel within this reality because this reality, which is only one reality we live in. On Earth, every natural family is very common and universal; there are many people on Earth do have their children and those do not, but living in a home isn't free at all because it's expensive, which it requires bills every month including cooling, electricity, heating, insurance, internet, and property goddamn tax! However, I know life is so unfair on this planet and it's pretty hard to live on this planet, but without being a recognizable person, also, not featuring on media or news coverage either, so that is why I'm almost done developing my own personal belief system, which is the Furuniverse, designed as one of the best universes to live in and speaking of this reality and my personal belief system where I developed so far, but I am thinking of I wanted to be reincarnated as a tall 6'1" anthro silver fox or an anthro coyote trapped inside my entire body before rebirth as an anthro husky girl living with new rich famous family for my personal belief, so this is going to be my last afterlife ideation update yada, yada, yada, at least if I have chance; if I live on Furoria in the Furuniverse after I leave this reality, so yeah, everything's different where the new world I see, which is a much lovely better place yada, yada, yada, I would see everything like buildings, power lines, roads, highways, trees, small towns, medium & big major cities, and more, but it's generally completely different and in my opinion, I wish I would be reincarnated either as an anthro wolf, anthro wolfdog, or an anthro fox for planning to choose either all 3 of anthro species, but might be fair enough for that.

8th of September, 2025

Oh, boy... I know the time is going too quickly for me nowadays, and usually the time is going too quickly for many people nowadays too yada, yada, yada, sometimes time is going slow and normal for many people nowadays like me and speaking of time that is either going slow, normal, or fast for many people, which people are doing something or simply not doing anything, I did upload a Kenworth T359 mod including promotion with my personal belief system online about 2 days ago and it got like over hundred downloads, which is pretty awesome 'cause I'm pretty happy about it and it's my last Australian-made Kenworth Truck mod for American Truck Simulator I've ever uploaded on the Internet, but hopefully it will get over thousand downloads if possible, also, it did took me a while to modify the last Australian-made Kenworth truck for American Truck Simulator, which is a Kenworth T359 mod for usually I was supposed to get it done modifying it, and then submit it on the Internet for trying not to take too much break, listening music, or doing other things, but occasionally, it was a hard freaking goddamn work, also, I did usually take a break too much, doing something other thingy, and simply not doing anything what I want, which it was like during summer in this year, apparently, I have nothing much what else say about my last Aussie-made Kenworth truck mod, so anyways.

9th of September, 2025

By the way, I would rather to use my cellphone before first bell and then school period starts, but apparently, it's not just a school district only, it's local government law, which I currently live in Oklahoma because it's the new rule is cannot use cellphones in school after first bell and then school period starts and it's not just the United States only, but other countries instituted local or regional laws for banning students' using cellphones in schools and by the way, there are some countries instituted national laws for banning students' using cellphones in schools, but not all of countries on this entire planet, but normally, I better have to be careful with that about my cellphone, which I rather use my cellphone before first bell and before school period starts after my different bus usually came to high school so damn quickly, which is nearly 8:00 AM, so yeah... usually in this school year, but speaking of the government ban cellphones in schools, 3 months ago back in May 2025 before I graduated high school, I also did make my new other friends and I literally added my new other friends' phone numbers for texting and calling, but unfortunately, some of my new other friends didn't reply me back on messages and didn't call me back either, but it happens, period.

14th of September, 2025

In my opinion, I chose to be reincarnated as a tall 6’2” anthro coyote trapped inside my full body, but me also known as KROVI (Russian: КРОВИ) or BLOOD with a normal weight, strong muscles, but not like being muscular, average feet size, which is usually my current feet size; normal feet type, balanced body, and 2 tails for living as only child independently in HIVAC Port Combine on Furoria before reborn as an anthro husky girl in mid-2001 ZE on Furoria, but starting a new life as a newborn anthro husky girl within new parents, which mother an author is age 19 and father a filmmaker is age 20, but rich and famous and new family that are rich and famous, so yeah, where I would be reincarnated as a tall anthro coyote before rebirth as an anthro husky girl including my middle name because my middle would not be the same that way, so my middle name will be Crowell and definitely my middle name will be no longer Taisuke, but that is my new afterlife plan ideation update, and the date is October (Howltober) 15th, 1990 ZE, where I will enter before my 15th birthday in May (Maylor) 12th, 1991 ZE, where previously, I’ve talked about it on my previous personal online journal I’ve written about 13 days ago; a personal journal post on DeviantArt, which I did posted it about a single month and it was long writing I’ve ever wrote in my entire damn life, but what happens if I’m dead, so I will be reincarnated as an tall anthro coyote as living only child with my new mythic girlfriend, where my memories and knowledge will be faded away, which I don't remember anything at all, always being a kinda shy person like sometimes shy, but I usually talk clearly always, even though I usually speak normally without muted, so I’ll live in HIVAC Port Combine or other places on Furoria for a long time, which I’m still claimed to be an anthro husky girl within new family that are rich and famous and have new friends and speaking of my death prediction in real-life, in the Furuniverse, the different real-life reality, Furoria is a utopia, just like Velirum, Huskarra, and other habitable planets in the Furuniverse, but there were some conflicts way back then in the deep past, which is different from Earth's wars, and the history of the Internet is just a fully utopia, unlike Earth’s messed-up things on the Internet in this universe, but in reality, Earth isn't a utopia at all, and the Internet too, which the Internet isn't a utopia at all. Basically, old big trucks, old buses like small, medium and big buses, old medium trucks, old pickup trucks and SUVs; whether mounted with inline 2, inline 3, or inline 4, turbocharged or naturally aspirated (and early mid-gen ones too), old tractors, old motorhomes, and other old machines (and mid-gen ones too) use either 4-stroke diesel engines or 2-stroke diesel engines, very similar to Earth's classic designs, and usually very similar to Detroit Diesel Series 53, 71, & 92, but not an exact copy, and obsolete until by the year 2002 ZE as of civilian use, which is final production is specifically for buses, construction vehicles, and fire trucks with semi-suppressors in it and obsolete until by 2010 ZE as of military/security use with semi-suppressors or suppressors in it for its production, which it sound like a petrol engine, also, sometimes diesel engines have semi-suppressors or suppressors in it, which it sound like a petrol engine, but mostly of many vehicles use 4-stroke engines because it's extremely common on Furoria and other non-futuristic habitable planets in the Furuniverse, there are some of many vehicles use 2-stroke engines, and there are some of many vehicles usually use rotary engines because they're both pretty common on Furoria and other non-futuristic habitable planets in the Furuniverse, but speaking vehicles’ & other machines’ engines, most vehicles on Furoria and other non-futuristic habitable planets in the Furuniverse are usually generic-type by a different brand and some of them are very similar, but not an exactly copycat.

17th of September, 2025

Okay, so, 11 planets in the Furstar System in size between with KM & miles:
Size in kilometers:
Middle of the Furstar System - Fursun - 2,275,874 KM in diameter and 1,137,937 KM in radius;
1st planet from the Fursun - Ketho - 8,919 KM in diameter and 4,459.7 KM in radius;
2nd planet from the Fursun - Pexon - 13,007.7 KM in diameter and 6,505.7 KM in radius;
3rd planet from the Fursun - Huskarra - 62,436 KM in diameter and 31,218 KM in radius;
4th planet from the Fursun - Furoria - 63,710 KM in diameter and 31,855 KM in radius;
Natural satellite that is orbiting Furoria - Furmoon - 3,498 KM in diameter and 1,749 KM in radius;
5th planet from the Fursun - Velirum - 57,339 KM in diameter and 28,670 KM in radius;
6th planet from the Fursun - Jovira - 501,382 KM in diameter and 250,691 KM in radius;
7th planet from the Fursun - Skythos - 28,878 KM in diameter and 14,439 KM in radius;
8th planet from the Fursun - Furvaan - 438,976 KM in diameter and 219,488 KM in radius;
9th planet from the Fursun - Thera 115,099 KM in diameter and 57,549.5 KM in radius;
10th planet from the Fursun - Zynthos - 98,251 KM in diameter and 49,125.5 KM in radius;
11th planet from the Fursun - Korsh - 4,852 KM in diameter and 2,426 KM in radius.
Size in miles:
Middle of the Furstar System - Fursun - 1,414,806 miles in diameter and 707,403 miles in radius;
1st planet from the Fursun - Ketho - 5,543.9 miles in diameter and 2,771.2 miles in radius;
2nd planet from the Fursun - Pexon - 8,082.3 miles in diameter and 4,041.15 miles in radius;
3rd planet from the Fursun - Huskarra - 38,798 miles in diameter and 19,399 miles in radius;
4th planet from the Fursun - Furoria - 39,593 miles in diameter and 19,795 miles in radius;
Natural satellite that is orbiting Furoria - Furmoon - 2,173.5 miles in diameter and 1.086.8 miles in radius;
5th planet from the Fursun - Velirum - 35,631 miles in diameter and 17,816 miles in radius;
6th planet from the Fursun - Jovira - 311,547.2 miles in diameter and 155,773.6 miles in radius;
7th planet from the Fursun - Skythos - 17,947 miles in diameter and 8,973.5 miles in radius;
8th planet from the Fursun - Furvaan - 272,747.6 miles in diameter and 136,373.8 miles in radius;
9th planet from the Fursun - Thera 71,506.1 miles in diameter and 35,753.1 miles in radius;
10th planet from the Fursun - Zynthos - 61,051.2 miles in diameter and 30,525.6 miles in radius;
11th planet from the Fursun - Korsh - 4,852 miles in diameter and 2,426 miles in radius.

That's all, but previously, back in April 8th, 2025 through August 8th, 2025, I did recently created the Furstar System, where it has 11 planets and the Fursun, the middle star in it that I created including age in years and size in diameter and radius including the Furuniverse's age and the One Paw of God's age in years and size in light years and speaking of age and size, Berdorons & Primatarins (excluding anthro lemurs) have abnormal biology and genetics, but usually very strong and their visions are pretty normal (and colorful) because their night visions are weak during nighttime, like humans do, but they don't act animal sounds at all; Petidrans/Therians & Altertherians have highly advanced and powerful biology and genetics, also, anthro canines, anthro felines, and anthro hyenas have powerful vision including colorful vision, night vision during nighttime, high resolution, and motion tracking; rest of Peditrans/Therians & Altertherians have powerful vision including colorful vision, night vision during nighttime, but not as strong as anthro canines', anthro felines', and anthro hyenas' night vision during nighttime, high resolution, and motion tracking, such as anthro bulls, anthro hogs, anthro pigs, anthro goats, anthro sheep (the only Peditran/Therian-Altertherian hybrid species), anthro cows, and anthro donkeys have their extreme abnormal biology and genetics and they also do act animal sounds, but anthro canines, anthro felines, and anthro hyenas too.

19th of September, 2025

Goddamnit! I feel like I'm kinda shy to write a very long online personal journal for some point instead, and fortunately, it took me so damn long to write it down, which it's longer and harder than expected to think about to be honest. Man... pretty crazy to think about; I don't know it sucks, but who gives a crap about these things. In reality, there are animal attacks, disasters, crimes, and more of these kinds of incidents that are so common; whether it's large-scale or small-scale. Therefore, this reality has so many limits and shit!!! And so many incidents that are so common too!!! So, anyways! Previously, I've talked about Berdorons & Primatarins that have abnormal biology and genetics, and vision are normal and colorful, but they recently do not use animal sounds at all, and Peditrans/Therians & Altertherians that have highly advanced and powerful biology, and vision that are so highly advanced, powerful, and colorful, but they usually do use animal sounds, such as anthro bulls, anthro hogs, anthro pigs, anthro goats, anthro sheep (the only Peditran/Therian-Altertherian hybrid species), anthro cows, and anthro donkeys have their extreme abnormal biology and genetics, and vision are abnormal and colorful, which their biology and genetics are way stronger than real-world humans' and animals' biology and genetics, so let's get on to it. So, back in April 2025, I created all 4 collective terms of anthro species, which is Peditrans/Therians, Altertherians, which Peditran/Therian & Altertherian lifespan is between same as humans on Earth the our planet, Primatarins, which their lifespan is between 100-140 years (excluding anthro lemur lifespan, which anthro lemur lifespan is between 60-80 years), & Berdorons, which their lifespan is between 60-100 years. However, I would say that Peditran/Therian & Altertherian lifespan is generally between 110-200 years, Primatarin lifespan is between 130-180 years (excluding anthro lemur lifespan because anthro lemur lifespan is between 100-120 years), and Berdoron lifespan is between 120-140 years, so yeah, anthro animals usually live longer lives than humans without diagnoses, epidemics, mental illness, and other suffering problems, which they live peacefully, lovely, and happily ever after, including Marinians, Reptilians, & anthro dragons, where they live outside Furoria and Huskarra, which they live in Velirum and other habitable planets that are either futuristic or non-futuristic in the Furuniverse, but Marinian & Reptilian lifespan is between 160-220 years, and anthro dragon lifespan is between 150-200; height of Marinians are around 6'3.5"-7'2" as a male and around 6'0"-6'9" as a female, height of Reptilians are around 6'0.5"-6'10" as a male and around 5'11"-6'5" as a female, and height of anthro dragons are around 6'1"-7'0" as a male and around 5'10"-6'7" as a female, also, they have highly advanced and powerful biology and genetics, and their vision is so powerful, just like anthro canines, anthro felines, and anthro hyenas have their powerful vision. However, protogens, sergals, and other alien furry species don't coexist at all in the Furuniverse and yeah, that is pretty much it what I had to say for now on.

3 days ago, I had a regular spaghetti and seasoned garlic butter toast, but at that time I recently ate double whole garlic butter toast with seasoning on it, and that taste was pretty freaking weird and disgusting because I never liked it, which it's pretty gross though. So, I was in the cafeteria during lunchtime about 2 days, and I did get school lunch including 2 burgers, one of them does have cheese on it and one of them doesn't, but I opened the wrap of hamburger and then turn into hamburger steak (or hamburg steak I would say) with a BBQ sauce on it, and it that taste was pretty freaking good and delicious my opinion, so yeah, and by the way, my other friend Joshua, he recently did gave the apple juice container to me, which he didn't want it anyways, but it was during lunchtime, which the 2nd lunch period was almost ended, literally. Oh, by the way, I met 2 of my new friends about a few weeks ago, her name is Nyome and her brother Robbie; they're the same age, but I'm like triple years older than both of them, and taller than both of them, also, I just enjoyed talkin' to my other friends and yeah, pretty often nowadays. - 9/21/2025

After I reincarnated as an tall anthro coyote for living as only child independently to enter Furoria, but before reborn as an anthro husky girl for living with new family that are famous and rich, I wanted go to New Brougham (called New Brougham City) the Auratheria's biggest and most populous city so badly, so I would see these cool nice skyscrapers including quad towers that are one the tallest modern buildings in the Furworld, where decided that I wanted to visit, so... why not? It's a lovely and pretty cool place, which I decided that wanted to go there including with my new mythic girlfriend Délphine Revord, the female anthro black wolf (I couldn't call it anthro wolfdog), which she's a pretty lovely girl, apparently, it's better way that have to take on the airplane to travel to New Brougham City, which taking on air travel is better than land vehicle travel because it takes forever and ever to travel to New Brougham City for taking on land vehicle, however, Furoria is a super-Earth scale planet because it has endless highways, fuels/supplies, and either more, also, Furoria has villages, small towns, medium towns, medium cities, big cities, and megacities, but in east and southeast Xianyora, there are futuristic structures out there on Chingduo, Furon, and Valkoraya because they evolved too early; medium towns, cities, big cities, and megacities on Furoria have advanced underground power lines to keep the streets clean, safe, and visually pleasing where overhead power lines are mainly concentrated near major cities, but there are villages and small towns have overhead power lines, because it's very common on Furoria, since it's cheaper and easier to maintain where the population is low, which it's pretty localized, especially outside of Chingduo, Furon, and Valkoraya, which utilities are too advanced here on east and southeast Xianyora. However, almost everything is united with the same purpose, it's not just Huskarra, Furoria, and Velirum only, other habitable planets in the Furuniverse, since it's everywhere and speaking of villages, towns, major cities, population, and power, on Furoria and other non-futuristic habitable planets in the Furuniverse, there are mostly of many big trucks use 4-stroke inline-6 diesel engines, just like the our planet Earth, many of them use 4-stroke v8 diesel engines, some of them use 4-stroke v10 diesel engines, which is less common, and some of them use 4-stroke v12 diesel engines, which is pretty less common too, but there are many older big trucks use 2-stroke v8 engines and 2-stroke v12 engines, which is pretty common, also, usually big trucks use 10-18 speed transmissions, and there are classic muscle cars, classic pony cars, and classic pickup trucks mostly use v8 engines (mid-gen ones and modern ones too), v6 engines, which is pretty common for classic pickup trucks (mid-generation ones and modern ones too), and inline-6 engines, which is pretty common for classic muscle cars (bit common), classic pony cars (bit common), and classic pickup trucks (mid-gen ones and modern ones as for pickup trucks too), but there are classic, mid-generation, and modern pickup trucks uses diesel engines too as well. However, muscle cars and pony cars are built with RWD! In reality, vehicle brands are definitely not united with the same purpose across countries on Earth, but there are vehicle brands that are united with the same purpose around some countries on Furoria because it's not the same as Earth's, and other habitable planets too, but it's just a different reality that I wanted live a much better place. - 09/23/2025

29th of September, 2025

Previously, I've talked about dozens of classic pony cars, classic muscle cars, and classic pickups use gasoline engines, but not all classic pickups use gasoline, which many classic pickups use diesel engines, big trucks use 4-stroke diesel engines, and older big trucks use 2-stroke diesel engines, which older big trucks use inline-6, v6, v8, and v12 2-stroke diesel engines, which is pretty common though, but not just muscle cars, pony cars, pickups, and big trucks, minivans and other vehicle classifications exist in the Furuniverse, but it's not the exactly same as Earth's, because Earth, which is the our planet we live in has every vehicle classifications, however, automobile brands are not united under the same purpose across countries on Earth and other things too, because other things are not united under the same purpose on Earth either, so yeah, but anyways. Oh, coyotes... the Furuniverse, the different real-life reality usually took longer than I originally expected, where I wrote in journals and created concept arts, but I think I am almost at the end, definitely. I know it's pretty freaking painful for me to develop my personal belief system much further than I expected, so apparently, I'll continue on. Anthro arsas, anthro bush dogs, anthro dholes, anthro diuvettés, anthro silvalus, and anthro tanukis (more like anthro raccoon dogs) are not the Furuniverse's best anthro canine species, but it's pretty common and densely populated, which it didn't achieve the much widespread on Furoria and other habitable planets in the Furuniverse, but in another dimension outside of the Furuniverse, population of anthro arsas, anthro bush dogs, anthro dholes, anthro diuvettés, anthro hiluxes (sometimes with 4 ears and 2–4 tails), anthro navaras (sometimes with 4-6 ears and 2–6 tails), anthro silvalus, anthro supras (sometimes with 4-6 ears and 2–9 tails) are very massive on the utopian planet Canitron and some of other planets in other dimensions (excluding anthro tanukis, more like anthro raccoon dogs), also, pets exist, but completely different than Earth's, yada, yada, yada, they usually owned either extra small-sized or semi-medium-sized ones as household pets, but big-sized ones as households pets are not efficient, however, it's not definitely the same as Earth's, but usually they recently do not own cats and dogs that are domesticated like Dobermans, German Shepherds, Labradors, Pugs, Turkish Angoras, Korats, Siamese Cats, Russian Blues, and more of cat breeds and dog breeds origin from different countries. Humanly, in our reality, pets are domesticated animals that humans selectively bred over thousands of years (like cats, dogs, horses, guinea pigs, etc.). Undomestically, sometimes people do keep wild animals as pets too as well, making them harder (and usually sometimes pretty dangerous) to care for, also, in our reality, there are dozens of vehicles have designs that are looking either awkward, bad, crappy, ugly, or weirdo, which is in very bad shape because of imperfection of Earth's reality, yada, yada, yada, not every design is succeeded, and some of them even became famous for looking bizarre or failing hard. In the Furuniverse and other realities, vehicles' designs are pretty balanced, but importantly, every vehicle looks consistent, efficient, and harmonious compared to Earth, which it's completely different than expected, but speaking of pets and vehicles' designs between our reality and different reality. Anthro wolves, anthro supras (sometimes with 4-6 ears and 2–9 tails), anthro painted dogs (more like anthro painted wild dogs), anthro navaras (sometimes with 4-6 ears and 2–6 tails), anthro hybrids (sometimes with 4-6 ears and 2–9 tails), anthro hiluxes (sometimes with 4 ears and 2–4 tails), anthro foxes (more like anthro vulpines), anthro dogs (which dog breeds as species), and anthro coyotes are one of the Furuniverse's best anthro canine species, but anthro maned wolves, anthro jackals, and anthro dingoes are one of the Furuniverse's decent anthro canine species and it's more common and massively populated! OH, YEAH!!! But speaking of anthro canine population! Fortunately, natural planet-killers and hypothetical weaponized planet-killers definitely cannot destroy Huskarra, Furoria, and Velirum the big three habitable planets in the Furstar System and other habitable planets in the Furuniverse, which is impossible it's because Furoria and other terrestrial planets in the Furuniverse are way too stronger than Earth, which is the our planet we live in and other planets in our universe to be honest! In the Furuniverse, and across other dimensions, there are v6 and v8 transversely-mounted cars usually built with mechanical radiator fans, where it has enough room for it, especially the mid-generation (late 1970s-2000s ZE) ones, even though the mid-generation (late 1970s-2000s ZE) inline-4 transversely-mounted cars too as well, but I'll just literally still continue for now on and yeah, that's all I say. ONE MORE PAGE TO WRITE DOWN AT THIS MOMENT, SO HERE I COME!!!

PART 1

This is actually my last page that I'm going to write, so here we go! Previously, I've talked about in the Furuniverse (and across other dimensions), inline-4, v6, and v8 powered mid-generation (late 1970s-2000s ZE) transversely-mounted cars built with mechanical radiator fans located on the front for enough room; it's not just many of them are built with FWD only, mostly of them are built with AWD, even though all of mid-generation (late 1970s-2000s ZE) transversely-mounted cars built with mechanical radiator fans it's because of the enough space for a mechanical radiator fan that are located at the front side. However, in the Furuniverse and across other dimensions, medium and big vehicles are built with mechanical radiator fans, but some medium and big vehicles rarely use electric radiator fans for its modifications, and speaking of vehicles' radiator fans, so let's get into this! Micropups, microhamsters, microkits, micromouses, burritopups, cakepups, breadpups, grilledpups, pastapups, pastakits, tacopups, and other unharmed plant-based Alibe Meals exist in the Furuniverse and other dimensions, unlive foods too, even though inside of unharmed, Alibe Meals are tasty, interdimensionally, meats are made from plants, and speaking of meals that are alive or not alive, which they're unharmed. Domestically, miniature coyotes (similar size to real-world medium-sized dogs because they're semi-medium-sized), foxes like silver foxes, red foxes, marble foxes, amber foxes, and many other types of foxes (very similar to real-world standard red foxes and size appearance too), pinto foxes that are climber foxes (which is very similar to grey foxes and size appearance too, though they commonly kept as exotic/non-domesticated pets), semi-dwarf/semi-miniature foxes (the arctic-type foxes that are very similar to real-world arctic foxes and size appearance too as well), dwarf/island/miniature pinto foxes that are small climber foxes (which is very similar to island foxes and size appearance too, commonly, they also kept as exotic/non-domesticated pets too as well, but little bit smaller than real-world house cats), dwarf/miniature foxes (which that are fennec-type small foxes, though they're smaller than real-world house cats and Chihuahuas, but very similar to fennec foxes), teacup foxes (similar size to regular hamsters or dwarf hamsters), teacup pinto foxes (which that are the tiniest urocyon species and yet the tiniest fox species to ever exist, even though it's similar size to dwarf hamsters or mice, but they commonly kept as exotic/non-domesticated pets), hamsters, otters (more like mini otters), rabbits, raccoons (more like miniature raccoons), miniature wolves (similar size to real-world medium-sized dogs because they're semi-medium-sized), and other medium or small non-anthro, non-talking pets exist in the Furuniverse, and across other dimensions too, which that became so popular outside of the Furuniverse, though it's not the same as Earth's, also, can give any treats to pets and sometimes wild animals without any danger or suffer from poisoning or toxicity, which they can eat or drink anything they want because of hypernatural biology due to its highly advanced biological systems, including my dogs that are non-talking, non-anthros (with Al and Hina & Lily's parents, step-parents, and older half-brother) in another dimension, which they live in old male anthro duck farmer and his wife's old massive underground home bunker with 3 floors with nice stairs connected with good old farmhouse yada yada yada, with their a lot of pets, which that are small, medium, and maybe few of large exotic pets that they own, including with two home elevators with automatic doors, which that can go through 1-5 stories between good old farmhouse connected with good old 3-story underground bunker, even though only few dark hallways, where they both have a lot of hobby collection, such as JoJo and his younger that they live in nice old portable home with ACs mounted on windows in the nice farmlands in the anthro duck world, the another world in another dimension, which everything is definitely united under the same purpose, but they're not just rare couples, they're legends, just like I did wrote the very long journal on DeviantArt before and after I posted yada yada yada, I did a lot of editing on my own, which the title is called "The Year Is 1990 ZE, Which I'll Be Reincarnated In" because it's featured in my previous writings before and after I posted on DeviantArt, actually. Safely, in reality, only giving some treats to pets and wild animals, which it's not recommended to feed them instead. Other treats like chocolate, grapes, onions, and other kinds of treats? OH, HELL NO!!! Never, ever feed other meals to them like this, never, because it's poisonous and extremely toxic and yeah, it's part of this whole single reality, where other dimensions don't really exist for sure, apparently. - 11/02/2025 (UPDATED - 12/20/2025)

STORY TIME! So, about 4 weeks ago, I did had tamales for the first time during lunch in school before and after the 2nd lunch period started, and it was so good, which me and both of my new friends ate together on the table, where it's located near the window, so yeah, it was my first time having tamales in this year, because I never had that food before, but it was after I did graduate high school this year and then came back in high school this year for doing work in coffee shop 'cause of adult programming, and then 3 days later on Friday, I did try some of Colombian foods for the first time, though it was pretty damn good and yeah, after me and both of my parents went to Colombian restaurant, my brother too, but it was 4 weeks ago, apparently, but most of kinds of meals? I've never tried it before. OH!!! By the way, about 3 days ago during the Halloween dress up day on the last day of October, after I got of the bus and then going through hallway before I entering throughout cafeteria, I saw there's like only 2 people in fursuits in real-life, which it was one the most surprising things that I've ever seen in my entire life because I have never like this before, but it was my first time seeing people in fursuits in real-life, otherwise, I've seen there are people wearing The Amazing Digital Circus costumes and other kinds of costumes that they wear, but it was pretty cool to see in real-life, and I did hear these high schoolers going crazy like kids screaming, yelling, and make other kinds of noises, even though it feels like I would cover my ears when someone make loud noises, which is loud, but it was before and after the 1st hour period bell on intercom speaker has rung, though I wish I have a fursuit or therian mask at home, so I would wear it in school for a Halloween dress up day on the last day of October and yeah, that's my wish, but after I graduated high school this year and then came back in high school as an adult student, where I'm doing work in coffee shop for adult programming, so yeah, that is my own dream. - 11/02/2025 to 11/03/2025 (UPDATED - 11/04/2025)

PART 2

In reality, most cars are front-wheel drive rather than rear-wheel drive or all-wheel drive/four-wheel drive because the system is pretty cheap to build, smaller, and more fuel-efficient due to lower costs for both manufacturers and consumers, though most cars use a transverse layout too due to of lower cost and weight. Back in these days, especially in the early 20th century through 1980s, most people used own cars that are rear-wheel drive since most cars were rear-wheel drive, but not anymore, which front-wheel drive one did took over in the late 20th century, even though in my opinion, I hate front-wheel drive cars than rear-wheel drive or all-wheel drive/four-wheel drive so much, because I can't trust about people own cars that are built with front-wheel drive, which it literally disgusts me a lot on this planet, but in the Furuniverse and across other dimensions, yes, occasionally, but I wish I could own a used pickup truck rather than getting a new one, additionally, I wish I could own fox as a pet to as well, and chances are not very many people on Earth own foxes as pets and not very many people on Earth own exotic/wild animals as pets either, even though that's my wish in our reality. Multiversally, in the Furuniverse and across other dimensions, most cars are rear-wheel drive or all-wheel drive/four-wheel drive, most cars have FR or F4 layout, and most cars are longitudinally mounted because it's more dominant than front-wheel drive cars, but I believe that I would a car, pickup truck, or a motorhome; whether it's small, medium, or big, which I can choose any kinds of vehicles what I want, otherwise, not like buying very expensive cars, mansion, and other very expensive things, which I don't want to buy. Monetarily, I believe that I'm wealthy because I own a lot of money, so I can buy anything that I want, but not like buying very expensive ones whatsoever. And honestly, I believe that I could restore old cars, old trucks, old buses, and some older vehicles, so I could convert an old big vehicle into a motorhome or something, I believe that I could be a substitute bus driver sometime, but maybe, I believe that I would own many pets, I believe that I will gain my real superpowers, but not like becoming a real superhero, I believe that I would have a night vision, I believe that I could get fruits and vegetables from trees; whether it's tropical, subtropical, non-tropical, or mixed, and I believe that I could do only some of other things like building model kits, building computers, and more of some other things that I could do, just like I've written my previous journals post before and after I posted on DeviantArt, and usually I could wear military boots, military pants, and military belt, baggy flare jeans, track pants, sweater, hoodie, or some other kinds of trousers and other kinds of clothes (which sometimes I could wear underneath my T-shirt), but it always depends that I would wear different kinds of clothing. Therefore, I could pet/touch or adapt/get small or medium animals (but some medium household animals are babies) in the lovely islands, non-island continental interior places; whether it's tropical, subtropical, non-tropical, or mixed, cold polar/tundra places, or even other landforms unlike Earth's, where miniature wolves, foxes, triple types of (urocyon species) wild pinto foxes (grey fox-type pinto foxes, island fox-type dwarf/island/miniature pinto foxes, and teacup pinto foxes the tiniest urocyon fox species; whether they live in islands, non-island continental interiors, tropical, subtropical, or temperate places), miniature fennec-type foxes, semi-miniature arctic-type foxes, teacup foxes, miniature coyotes, and other medium and small domesticated household animals and non-domesticated animals that live in the wild in these nice lovely islands, non-island continental interiors, cold polar/tundra places, and other landforms; some animals species in across other dimensions that are formed in the Furuniverse, some animals species aren't, even there are many animals, like miniature wolves, foxes, miniature coyotes, and other kinds of medium and small household animals and non-household animals in the Furuniverse (and outside of the Furuniverse) that have floppy ears and many animals in the Furuniverse (and outside of the Furuniverse) that have pointy ears too as well, but it's part of my personal belief for my post-reincarnation as an anthro coyote before rebirth as an anthro husky girl, but born as newborn baby anthro husky girl with living a new rich and famous family (before transforming into an anthro marble fox girl, anthro marble fusky girl, anthro coyote girl, anthro coydog girl, anthro wolf girl, or an anthro wolfdog girl until becoming a young adult after going to another dimension or staying in the Furuniverse due to its natural ways if that happens, so it would be the one of the wildest ways ever done), I'm no joking and I'm no kidding at all, but that's my afterlife plan involving leaving the world in this reality, which is part of my strong and powerful personal belief and going to a much better place rather than living in heaven, hell, and other everyday normal afterlives; in truth, nothing is the same, and nothing is based on everything in this reality, which I'll never see anything from this reality ever again forever. However, I believe in long, long, long time and forever and ever in other dimensions, especially in the Furuniverse and across other dimensions, excluding this reality, which that would be boring, pointless, and extremely unnatural if everything's the same and yeah, there's no possible way it would work! 100% IMPOSSIBLE!!! At that time life is not the end for me and yes, it would be nice to live in a better place than here, but pretty much. - 11/23/2025 (UPDATED - Friday, November 28th, 2025, which yesterday it was Thanksgiving day on Thursday, November 27th, 2025! - 12/21/2025)

PART 3: In the Furuniverse and other dimensions, (sometimes) vans, SUTs, SUVs, pickup trucks, some medium-duty vehicles, and some heavy-duty vehicles are built with coyote road-capable and coyote off-road-capable by default, there are no civilian weapon ownership because they (civilians) can't afford to own weapons, sometimes pets do tilt their heads, just like dogs do in our reality, pets do wear shirts, jackets, and other clothes sometimes, pets have pink paws, brown paws, and other kinds of paw colors (but they're not limited to Earth-like, although pretty smooth to touch), sometimes pets can be shy, and pets also do sleep with huge pile cuddling together (also, miniature fennec-type foxes, teacup foxes, and other small pets do sleep together in huge piles; whether its 6 through 20+, which over 20 of them can fit in the habitat case, and can fit in the bed if the owner sleeps on the bed! However, if medium pets are babies, so yes, always in huge piles, but sometimes medium pets sleep together in huge cuddly piles, though just few, which can fit in the bed too as well, if the owner sleeps on the bed! One day, I'll sleep with them at all night long a lot of times, and sometimes taking a nap during daytime when I get tired sometimes), but at nighttime and sometimes daytime for taking naps yada yada yada, sometimes they sleep on the bed, sometimes they sleep in bathrooms, sinks, laundry baskets, under-sink storages, and closets, which is pretty funny because it's so unexpected, and sometimes they sleep somewhere else, also, they have colorful eye visions where they see everything, they live healthier, longer, and easier lives without any diseases and issues/problems, they generally don't gain weight as quickly as humans and animals do (which takes a long, long time to gain weight), their teeth is too stronger than humans' and animals' teeth, almost sickness is cured, their bones, skins, and muscles are uncuttable, unbreakable, and unkillable, their bodies can stretch, compress, and flex beyond Earth norms, their whole bodies are balanced, and they feel no pain, no anxiety/fear, and no suffering too as well (including non-anthro animals and other humanoid species too as well), and they usually eject out of digestive for spitting out after they drinking, eating, or swallowing non-food or non-beverages due to its cure process for anthropomorphic animals, non-anthro animals, and other humanoid species, unlike humans and animals do on Earth, but that's how it works, and speaking of biology that are extremely resilient. In reality, I know people don't like listening to someone blowing their nose in the kitchen sink or bathroom sinks, I knew it, I'm bear with you, I know I don't like that either as why, which is so gross, though weird noises startled me sometimes. I always hate listening to my dad blowing his nose so much, not just my dad blows his nose on tissues only, but in the sink too as well; whether it's located in bathroom if the door is open or kitchen, but it startled me sometimes due to its lack of sound privacy, which I just can't trust about that kinda weird sound, but instead, I know people don't like their parents that are getting worried, frustrated, pissed off, or explosive, which unfortunately, it could make people absolutely scare the shit out of them, I know people don't like their parents asking too many questions, and I know people don't their parents asking weird questions like "Who are you talking to?", "Did you eat something?", "Are you okay?", "What are you doing?", or other kinds of weirdo questions, which is unnecessary, intrusive, kinda rude, annoying, or overly personal questions, I knew it, I'm bear with you, I know I strongly dislike like that too as why, sometimes it makes me feel uncomfortable due to lack of privacy and loss of inspiration when I was trying doing somethin' and talkin' myself in private instead, however, it is very real and far too common, but in the Furuniverse and across other dimensions, they don't annoy ask too many questions, which it could be unnecessary, intrusive, kinda rude, annoying, or overly personal questions because due to its respectful ways. Typically, there are people out there who share a lot of topics, like their family members, their pets, video games, firearms, and other kinds of topics; whether it's now or the past, which either long time ago or not too long ago, so yeah, since sometimes they privately talk too much about guns, video games, and other kinds of topics during when I was in school, sometimes other public places, sometimes at home, sometimes riding on the car, and sometimes riding on the school bus, which I heard it before couple times, and unfortunately, it startled me sometimes, even though sometimes I privately talk a lot too as why, no joke, and chances are everyone's different, we are all different, but speaking of people sharing different topics privately in our reality, in the Furuniverse and across other dimensions, they privately talk a lot, but they don't overshare like humans do on Earth, which is in balanced, controlled, and intentional way and speaking of anthro animals and other humanoid species sharing topics without oversharing in private, there are Super-Furoria planets, super-Huskarra planets, super-Velirum planets, etc., which is 5.5 times bigger than our planet Earth or beyond, but mostly of planets in the Furuniverse are habitable rather than uninhabitable, and there are anthro animals in Super-Furoria planets, super-Huskarra planets, super-Velirum planets, and other super habitable planets also live way longer lives than Furorians, Huskarrans, and Velirumites, which they live thousands, potentially millions, or potentially immortal years! Oh! By the way, wildlife does exist in the Furuniverse and across other dimensions, but completely different, even though there are little to no imports/exports in the Furuniverse and some other dimensions, including all of these countries on Furoria! But anyways, though! I don't feel like I have a chance to edit a lot of previous writings on Furry Selection Basement Journals, which it's too much for me to edit, even if I have a chance to edit, but naw... I don't think I wanted to, but I'll might just stop right there, so I'll might shift into a different worldbuilding that I wanted to create is the Alteruniverse (Universe V2.0) and MLSU (My Little Stephen Universe), which I made an announcement video on YouTube under username "theStephengate2005" about triple weeks ago, which the video titled "Furuniverse Reality Basement Collection Promotion Announcements - Pilot - 11/09/2025" blah blah blah blah blah, that video has a long description and diverse topics, although, it did took so long than I originally expected, but I wish I would start writing my own personal journal entries since 2015. Afterwards on Earth, everyone acts differently, especially when everybody cares or nobody cares who they are; whether they have friends or no friends due to its isolation, loneliness, and unfairness, however, in reality, life is genuinely hard and complicated, and many people struggle. All in all, in the Furuniverse, life feels perfect, easy, and peaceful, even though the Furuniverse is an utopian reality (which it can be spiritual, but in a different way than real-world religions and afterlife systems), but in other dimensions outside of Furuniverse, life feels easy or normal; perfect or imperfect, but it literally coyote depends (which some are fantasy, some are hybrids, and others are completely different, including Christmas worlds, Halloween worlds, etc., but they're secret, mysterious, and hidden dimensions), unlike Earth's, where there's still a lot goin' on out there on our planet. But I believe that I would truly enjoy nature, which that would be so coyote nice to go into nature and truly enjoy it, and I believe that I feel no pain, no anxiety/fear, and no suffering, my muscles are uncuttable, unbreakable, and unkillable, and my whole body can stretch, compress, and flex too (my new mythic girlfriend Délphine Revord AKA CHiEN-lOUP too, where she feel no pain, no anxiety/fear, and no suffering and her bones, skins, her muscles are uncuttable, unbreakable, and unkillable, and her whole body can stretch, compress, and flex too, but it's like you're being an alien because you're not a human being at all), where my suffering will go away (pretty much) after my reincarnation before rebirth, even though not based on real-world science or medical evidence due to my strong personal belief for my plan to enter the super-Earth planet Furoria before traveling to other dimensions, so they would not just call my name or my new alias KROVI (Russian: КРОВИ) or BLOOD only, they would call me son, sir, kid, brother, etc., so yeah. - 12/05/2025 (Updated on 12/25/2025, which today is Christmas day, but it's already over until next year.)

PART 4

Previously, about 6 months and 29 days ago, I've talked India and Pakistan have declared drone strikes, air strikes, and missile strikes on Jammu and Kashmir after India and Pakistan declared standoff (even though it was an "act of war", unlike India and Pakistan officially declared war toward each other), which it was according on the news, although it was a short conflict in just only 4 days, no joke; in 10th of May, 2025, India and Pakistan stopped declaring drone strikes, air strikes, and missile strikes on Jammu and Kashmir, which is indeed disputed among by Pakistan, India, and China due to ceasefire after the deadly terrorist attack on Pahalgam in India-administered Jammu and Kashmir was occurred in 22nd of April, 2025, so yeah, it was 2 days later in back in 12th of May, 2025, which it was my 20th birthday. So, about 3 months ago according on the news, there's was a meeting between Donald Trump and Vladimir Putin in Alaska without a ceasefire due to Russia and Ukraine ongoing fight each other since back 24th February, 2022, in which about 3 years ago, Russia started invade Ukraine again, just like back in 2014 where Russia have invaded Ukraine, which only just Crimea before Crimea physically occupied by Russia since in March 2014; 11 years ago back in March 2014, Russia took control of Crimea, which had been officially part of Ukraine and yeah, it happened before when I was only 8 years old before my 9th birthday in May 2014, but it was way back then, so anyways! Just like Donald Trump officially met Vladimir Putin in person like six times during Trump's first presidential term (2017-2021) before the global COVID-19 outbreak began worldwide in early 2020, and before his second presidential term (since this year). - 12/07/2025

Man... I've been takin' a shit in the bathroom like too many times over a couple days because of my digestive issues, but it's not just me only, though, other people too. However, I know people dislike having to go to the bathroom take a shit too many times over couple days, I know people dislike getting a nosebleed when they're trying to blow their nose (sometimes I did get my nosebleed too when I tried to blow my nose due to dryness or inflamed/irritated nasal tissue), I know people dislike traffic jams, I know people dislike watching ads on YouTube and other video sharing platforms online (which mostly ads today are unskippable), I know people dislike being told they startled someone (yeah, unfortunately, it startled me sometimes), I know people don't like people drivin' into traffic jams, and I know people dislike other kinds of bothersome things, I knew it, I know, I know I'm bear with you, I don't like that either as why, which I'm not really a huge fan of bothersome things, however, Youtube ads on other kinds of things bothers (and startled) me sometimes (and other people too) when I enter online like YouTube, TikTok, etc., but speaking of bothersome things and online. On Earth, you're born either as a male, female, or sometimes in-between (which is pretty rare; intersex ≠ LGBTQ), but different places on Earth depending you're being born in and different types of families, different types of human race, different types of nationality depending you're being born and raised with (without featured on the news); whether families are short, average, or tall, however, you don't born and raise without a biological or adaptive family on Earth, where almost everything is no free and no easy at all (unlike you're being a cryonic-appearance person, machine-born person, or a magical-appearance person living in the different reality, like in the Furuniverse and across other dimensions, living as only child independently, without a family, and thrive easily for having with new groups or friends), although being a famous person doesn't automatically make your life easier or better because it's not gonna work and not gonna do anything for you automatically, because due the loss of personal privacy; if you wanna be famous, so you have to work very, very hard, unlike becoming an infamous person that seem easier than fame for doing bad/harmful things, which requires consistency, handling public pressure, persistence & resilience, promotion & networking, skill/talent, and time & effort, so yeah, you cannot truly become famous through easy work, but that's what happens, even though is part of in our reality, where there's just only one reality, one solar system, one Earth, one world, and over 8 billion by today on Earth in our reality, where terrestrial (and jovian as gas giant) planets aren't (mostly) habitable planets, in which Earth is the only known planet that supports life on it and dimensions aren't parallel or separated from multiple different universes either, but rather directions you can travel in within a our universe because it's only one universe that we live. Our current reality has 3 dimensions of space (length, width, & depth/height) and one dimension of time, which is total 4-dimensional spacetime, however, 6, 7, or more extra dimensions are hypothetical and extremely far away from now on. Comic book/fictional physics ≠ real-life physics. - 12/11/2025 (UPDATED - 12/14/2025)

About 3 days ago, I was in a barber for the first time and then I recently got my whole hair shaved, which my hairstyle was bit funky and yeah, I haven't had my own short hair for years, after I grow my hair back into a long hair since 2022, which it did took me months and months to grow back, though it was couple years back then, but anyways. So, I when I was kid, I recently grow my hair into long hair so quick and yeah, couple times I did it before, but I'm pretty glad that I wasn't upset about my hair, which my hairstyle was bit funky after last night, I've cut my whole hair off (and shaved some of parts of my hair) to get rid of my long hair by using couple amounts of touch-up razors (which I've actually done it for the first time) and then clean up the mess on the floor, counter, toilet, bathtub, and the sink in the hallway bathroom, which I was hard for me to do, even though I haven't done it before in the deep past, but it was 3 days ago, so yeah. - 12/11/2025

PART 5

This is my last page that I'm going to write, so here we go! In the Furuniverse and across other dimensions, freedom is generally free, things are free and easy, one-time payment is extremely common, and rules are completely different than here. I will be there so lovely! I believe that I'm right-handed (but I could use my left hand for a couple things), I believe that I wouldn't fart excessively everyday for doing on-purpose for no reason, unlike in our reality as I'm a human being, I do fart excessively for doing on-purpose for no reason for every single day (and other people fart excessively every single day for doing on-purpose too, but that's what happens), I believe that I don't gain much weight (which it takes a long long time to gain weight for eating too much), I believe that I have normal-pitched voice, I believe that I could wear a cowboy hat, wild rag, cowboy boots, both (it depends on), or triple of them (or become a cowboy/country guy), I believe that English/Furolish is my native language (maybe one day I could speak other different languages that aren't formed from Earth), I believe that I could write easier than hard (as of human, yes, sometimes development of writing skills takes a while to get easier and better; fictional fame or infamy/skills ≠ real-life fame or infamy/skills), I believe that I could use animal sounds (me as of anthro coyote, yes), and I believe that I could grow long head hair as curvy/wavy hair, but it's part of my personal belief for my post-reincarnation before rebirth (in the Furuniverse), so yes, after once I've entered it, everything from here (in our reality) will be long gone forever, which I'll be an only child, living independently, and thrive easily because they have perfect time hearing and they also understand very well, so I'll have my new friends or groups to hang out with them for real; I would've met them, so I recently can go any places in the Furuniverse and other dimensions what I want rather than daily-life limitations, though I would've rode in my new friends' car or a medium-duty or heavy-duty vehicles (like motorhomes, converted buses, etc.) that are owned by my new other friends, also, I can drink and eat without going to any wrong or dangerous areas, that's my plan to go there and live in the Furuniverse reality (or going to another dimension to live), which is better than here. Speaking of living in the Furuniverse and going or moving to other dimensions, in reality, there are enormous amounts of news published online in every single motherfreaking day by today, and it never ever stops at all, unlike in the past, which news used to have clear limitations, but there are mostly of online news are real than fake and yes, no joke, no kidding. Although not just on Google only at all when I enter Google, everywhere on the whole internet when I enter it, which is crazy! CRAZY, CRAZY, CRAZY!!! HAHAHAHA!!! Man... so much online news, like wildlife (prey vs predator encounters, animal behavior videos. etc.), politics (which in my opinion, I don't give too much crap about politics), UFO sightings, disasters, and more! But it startled me and bothered me sometimes, and speaking of online news; whether it's local, national/regional, or global, in our reality, vehicles and most everyday objects aren't designed with generic-type or cartoon-type shapes whatsoever, because cartoon-style or generic-style vehicles and most everyday objects are belong to fiction, which pretty is easy to draw and animate. In the Furuniverse and across other dimensions, vehicles (that are made by different brands on Furoria, but in the Furuniverse and across other dimensions, whether vehicles are branded or unbranded) and most everyday objects are designed with generic-style or lightly cartoon-style, but a realistic and purposeful look, but some are similar, but not an exact copycat. Besides vehicles, there are electronics out there that are branded (especially on Furoria) or unbranded, also, non-electronics items (clothing, furniture, tools, etc.) are definitely unbranded (besides tires because many tires are branded, especially that are made from Furoria) in the Furuniverse and across other dimensions due to independent production and generic design, but in reality, mostly everyday objects are branded, some are unbranded, but speaking things that are branded or unbranded, generic or non-generic look in realistic way. Commonly, there are (gray fox-type) pinto foxes, (island fox-type) dwarf/island/miniature pinto foxes, and teacup pinto foxes (tiniest urocyon species) are already exotic pets, which all 3 kinds of (urocyon species) pinto foxes (two of them that are pinto foxes and miniature pinto foxes do actually climb because they're natural climbers) as exotic pets are extremely popular in Ducklandia and Liberen (including its territories) and only few of medium and small wild animals (including only some of fox species) are somewhat popular as exotic pets in Ducklandia and Liberen (including its territories), even though in around the whole Furworld (Furoria) outside of Ducklandia and Liberen, all 3 kinds of (urocyon species) pinto foxes as pets are bit popular, however, domesticated medium and small pets are more popular than all 3 kinds of (urocyon species) pinto foxes in around the whole Furworld (Furoria), though chances are triple types of pinto foxes (grey fox-type pinto foxes, island fox-type dwarf/island/miniature pinto foxes, teacup pinto foxes the tiniest urocyon fox species), and only few of medium and small wild animals (including only some of fox species) were extremely popular in Darrakoon and Auratheria way back then, but usually pets reach adulthood at around 3-5 years and wild animals reach adulthood 2-10 years, depending on the species and individual development. Besides pets and wildlife, cars, airplanes, helicopters, spaceships, boats, and everyday objects exist, but completely different from here! And speaking of everyday objects in the Furuniverse and many other dimensions and pets; whether it's exotic or domesticated, I might be continuing on doing something, but the Universe V2.0 and MLS Universe that I'll be working on, which I don't want to write too much on my own, of course, that's why I don't want to write way too longer than I thought, so yeah, I think that's pretty much it what I had to say.

Anthro animals from the Furuniverse, other humanoid & non-humanoid species, and Animalians (as of talking non-anthro animals) in across other dimensions, I'll be there with you guys! You promised me, I promised you!

Humans, stay safe... I know my previous writings kinda suck and communication isn't perfect, and yes, we all know it... but that's part of our reality... farewell... - 12/29/2025 - OH! Btw, 3 days 'til 2026!

Regards,

Rinty SkyCoyote
